Batch:2024
Zone no: Zone 8

1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

Solution:

Step 1: Create Custom Objects

Assuming you have two custom objects, let's call them "College_C" and "C Department_C". If you haven't already created these objects, you can do so by going to Setup > Object Manager > Create > Custom Object.

The screenshot shows the Salesforce Setup interface with the following details:

- Header:** Includes the Salesforce logo, a search bar labeled "Search Setup", and various navigation icons.
- Breadcrumbs:** "Setup" > "Object Manager" > "New Custom Object".
- Title Bar:** "SETUP" and "New Custom Object".
- Message Bar:** "Permissions for this object are disabled for all profiles by default. You can enable object permissions in permission sets or by editing custom profiles." with links "Tell me more!" and "Don't show this message again".
- Custom Object Definition Edit:**
 - Custom Object Information:** Fields include "Label" (college), "Plural Label" (colleges), "Example" (Account), and a checkbox for "Starts with vowel sound".
 - Description:** A large text area for describing the object.
 - Context-Sensitive Help Setting:** Radio buttons for "Open the standard Salesforce.com Help & Training window" (selected) and "Open a window using a Visualforce page".
 - Content Name:** A dropdown menu set to "None".
- Enter Record Name Label and Format:** Fields include "Record Name" (college Name), "Example" (Account Name), and "Data Type" (Text).
- Optional Features:** A list of checkboxes for enabling reports, activities, field history, chatter groups, and licensing.
- Object Classification:** A note about enterprise vs light application objects, followed by checkboxes for sharing, bulk API access, and streaming API access.
- Deployment Status:** A radio button for "Deployed" (selected).
- Search Status:** A note about allowing users to find records, followed by a checkbox for "Allow Search".
- Object Creation Options (Available only when custom object is first created):** Checkboxes for "Add Notes and Attachments related list to default page layout" and "Launch New Custom Tab Wizard after saving this custom object".
- Buttons:** "Save", "Save & New", and "Cancel".

Second custom objects, let's call them
"Department_C"

The screenshot shows the Salesforce Setup interface with the 'Object Manager' tab selected. A message at the top indicates that permissions for the new object are disabled by default. The 'Custom Object Definition Edit' screen is displayed, with the 'Label' field set to 'department' and the 'Plural Label' field set to 'departments'. Other fields like 'Description' and 'Record Name' are also visible. The 'Optional Features' section includes checkboxes for 'Allow Reports', 'Allow Activities', 'Track Field History', 'Allow in Chatter Groups', and 'Enable Licensing'. The 'Deployment Status' section shows 'Deployed' is selected. At the bottom, there are 'Save', 'Save & New', and 'Cancel' buttons.

Step 2: Create a Master-Detail Relationship

To create a Master-Detail relationship between these two custom objects, follow these steps:

1. Goto Setup > Object Manager.
2. Click on "College__c" to open its settings.

3. In the left sidebar, click on "Fields & Relationships."
4. Click the "New" button to create a new custom field.
5. Choose "Master-Detail Relationship" as the datatype.
6. Enter a label for the relationship, e.g., "Department __c."
7. Choose "Department __c" as the related object.
8. Configure other settings as needed and click "Next."
9. Specify the field-level security and add it to relevant page layouts.
10. Click "Next" and "Save" to create the relationship.

The screenshot shows the Salesforce Object Manager interface for the CDepartment object. The left sidebar contains navigation links for Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, Flow Triggers, and Validation Rules. The main content area displays the object's details, including:

- Description:** CDepartment
- API Name:** CDepartment__c
- Custom:** ✓
- Singular Label:** CDepartment
- Plural Label:** CDepartments
- Enable Reports:** (checkbox)
- Track Activities:** (checkbox)
- Track Field History:** (checkbox)
- Deployment Status:** Deployed
- Help Settings:** Standard salesforce.com Help Window

At the top right, there are "Edit" and "Delete" buttons.

The screenshot shows the process of creating a new relationship for the CDepartment object. The left sidebar is identical to the previous screenshot. The main content area is titled "New Relationship" and is divided into steps:

Step 3. Enter the label and name for the lookup field

Step 3 of 6

Previous Next Cancel

Fields & Relationships

Field Label: College

Field Name: college

Description: (empty)

Help Text: (empty)

Child Relationship Name: CDepartments

Sharing Setting: Select the minimum access level required on the Master record to create, edit, or delete related Detail records:

- Read Only: Allows users with at least Read access to the Master record to create, edit, or delete related Detail records.
- Read/Write: Allows users with at least Read/Write access to the Master record to create, edit, or delete related Detail records.

Allow reparenting: Child records can be reparented to other parent records after they are created

Auto add to custom report type: Add this field to existing custom report types that contain this entity

Lookup Filter: (dropdown menu)

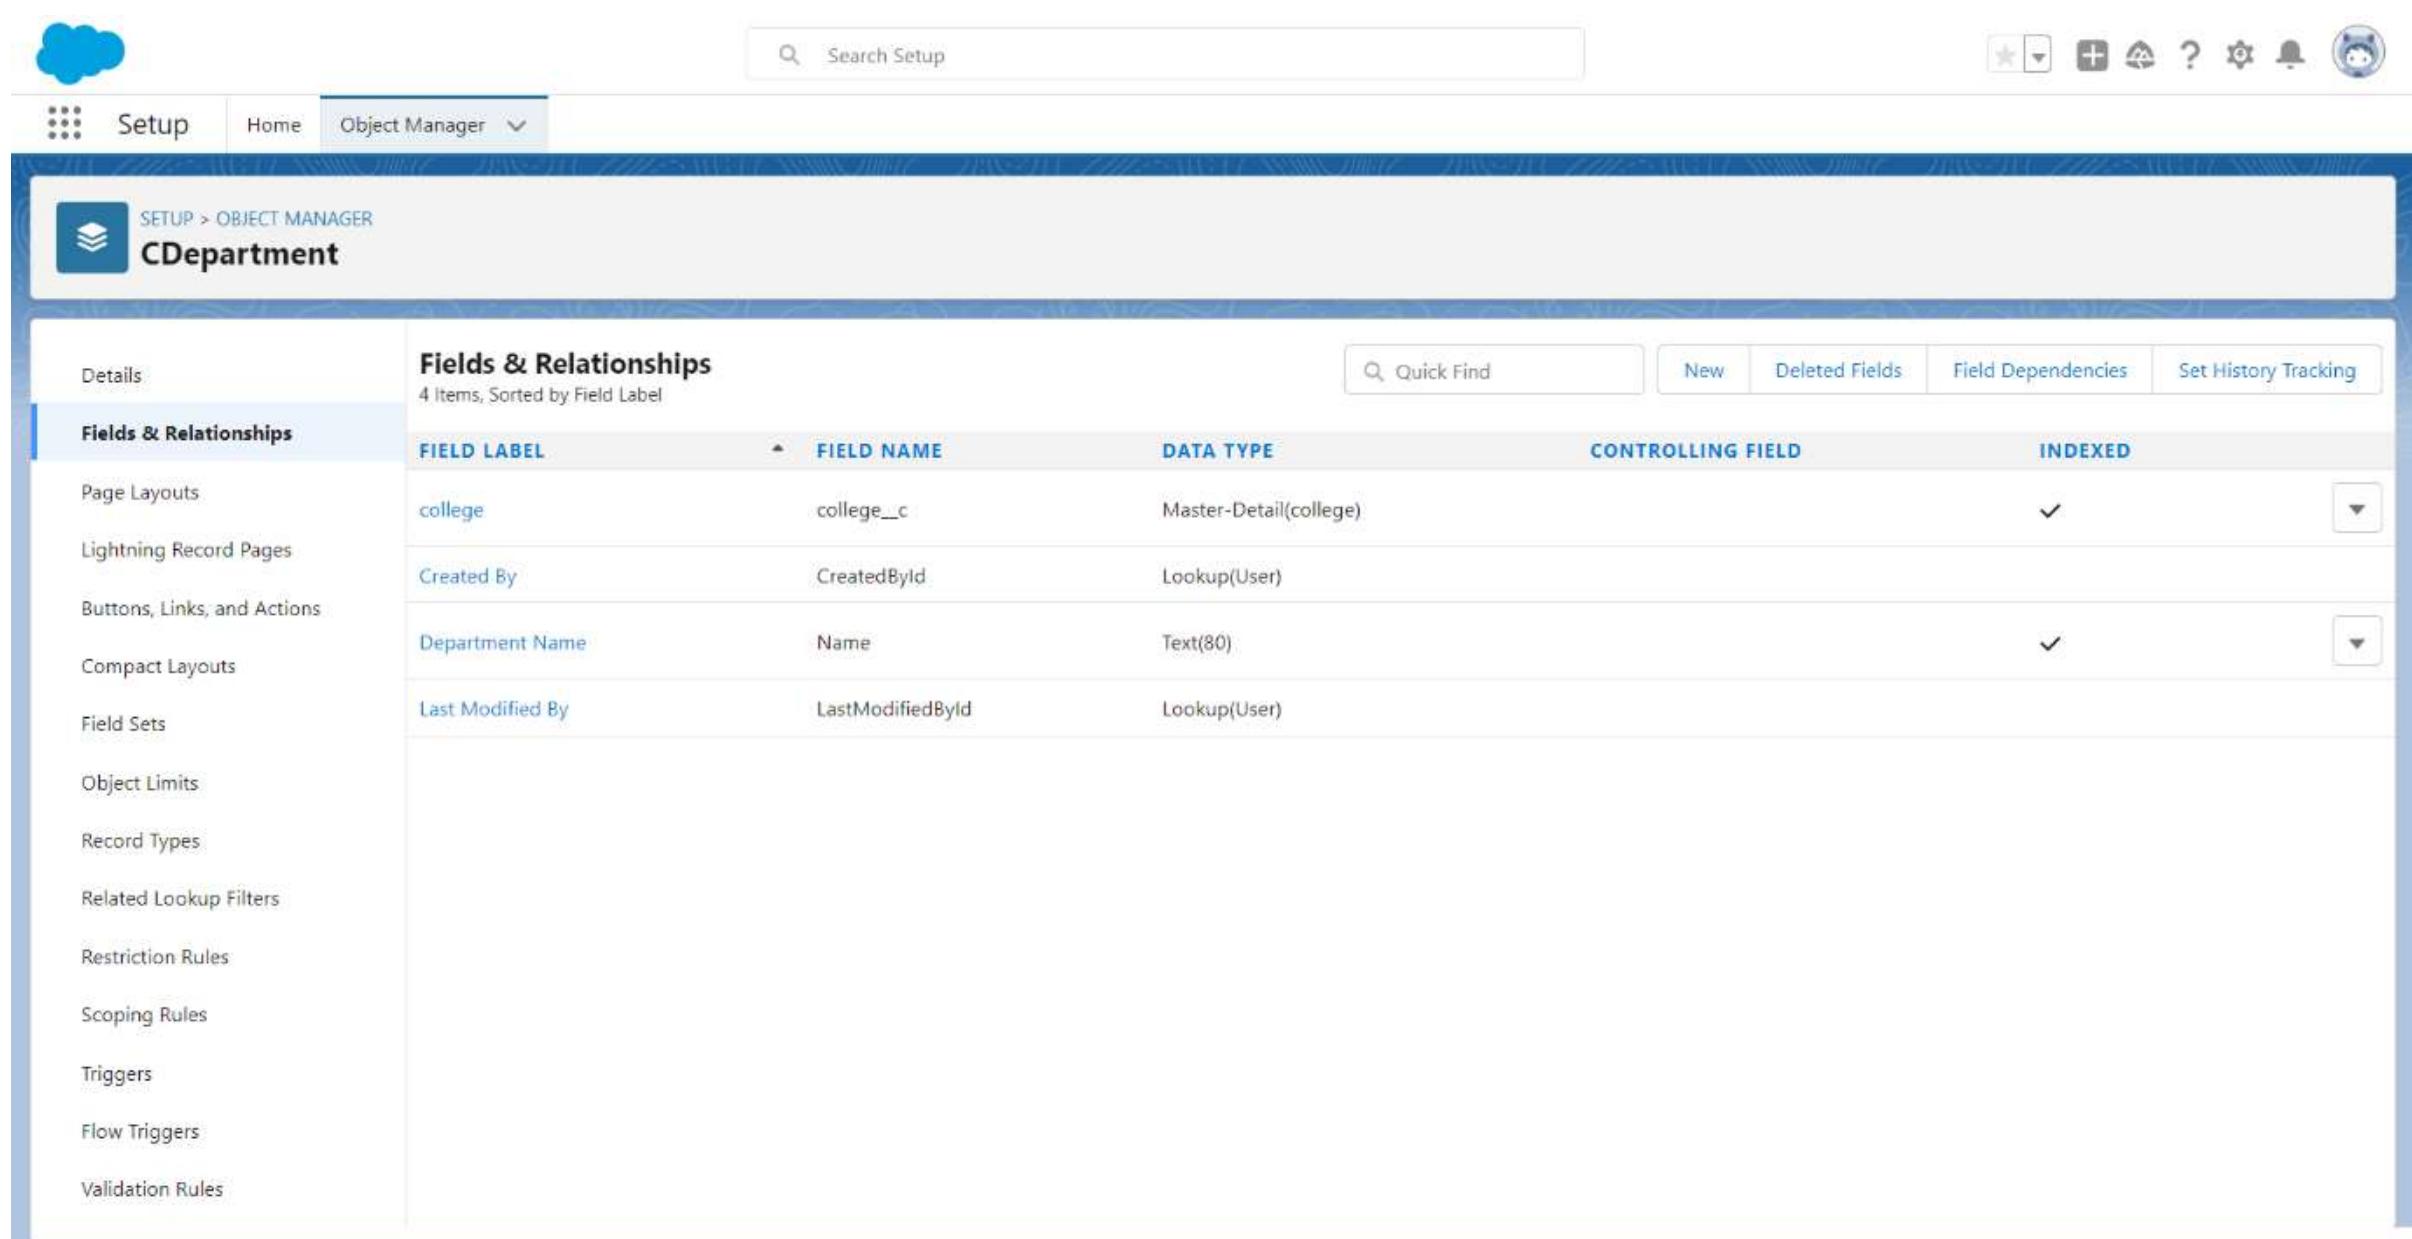

Step 3: Create the Roll-Up Summary Field

Now, let's create a Roll-Up Summary Field on the "College_C" to calculate the total number of related records in "Department_C":

1. Still on the "College_C" settings, go to "Fields & Relationships."

2. Click the "New" button to create a new custom field.
3. Choose "Roll-Up Summary" as the datatype.
4. Enter a label for the field, e.g.,
5. Choose "Count" as the Roll-Up Type.
6. Select "Department__c" as the object to roll up information from.
7. Specify the filter criteria if you want to filter the related records.
8. Configure other settings as needed and click "Next."

9. Specify the field-level security and add it to relevant page layouts.
10. Click "Next" and "Save" to create the Roll-Up Summary Field.

The screenshot shows the Salesforce Setup interface with the following details:

- Header:** Search Setup, Setup, Home, Object Manager
- Breadcrumbs:** SETUP > OBJECT MANAGER CDepartment
- Left Sidebar (Fields & Relationships):**
 - Details
 - Page Layouts
 - Lightning Record Pages
 - Buttons, Links, and Actions
 - Compact Layouts
 - Field Sets
 - Object Limits
 - Record Types
 - Related Lookup Filters
 - Restriction Rules
 - Scoping Rules
 - Triggers
 - Flow Triggers
 - Validation Rules
- Table:** Fields & Relationships (4 items, Sorted by Field Label)

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED

Tabs

Didn't find what you're looking for?
Try using Global Search.

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Action	Label	Tab Style	Description

Salesforce Setup Page

college > Object Manager

New Custom Field

Step 1. Choose the field type

Specify the type of information that the custom field will contain.

Data Type

- None Selected
- Auto Number
- Formula
- Roll-Up Summary
- Lookup Relationship
- Master-Detail Relationship
- External Lookup Relationship
- Boolean

Select one of the data types below.

A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Allows users to select a True (checked) or False (unchecked) value.

Step 1

Next Cancel

The screenshot shows the Salesforce Object Manager interface. The top navigation bar includes 'Setup', 'Home', and 'Object Manager'. A search bar at the top right contains the text 'college'. Below the navigation is a breadcrumb trail: 'SETUP > OBJECT MANAGER college'. On the left, a sidebar lists various setup categories like 'Page Layouts', 'Lightning Record Pages', and 'Validation Rules'. The main content area is titled 'Fields & Relationships' and displays four items sorted by Field Label. A table provides details for each field:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
college Name	Name	Text(80)		✓
Created By	CreatedById	Lookup(User)		
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User,Group)		✓

Step 4: Create a Lightning App

1. Type and select "App Manager."
2. Click "New Lightning App."
3. Fill in basic information (Name, Developer Name, Description).
4. Choose the App Type (Standard, Console, Custom).
5. Customize the Logo and Colour Scheme.
6. Configure Navigation Items (objects to appear in the app's menu).
7. Set the App Visibility (default access).

8. Optionally, choose Record Pages (Lightning Record Pages).

9. Review and Save the app.

10. Assign the app to users or profiles.

11. Test the app with the assigned users.

The screenshot shows the Salesforce Setup interface for managing tabs. The left sidebar includes links for Setup, Home, Object Manager, and a search bar. The main content area is titled 'Tabs' under the 'User Interface' section. A sub-section titled 'New Custom Object Tab' is shown, specifically 'Step 2. Add to Profiles'. It instructs the user to choose user profiles for the new tab's availability. A note states: 'Choose the user profiles for which the new custom tab will be available. You may also examine or alter the visibility of tabs from the detail and edit pages of each profile.' Below this, there are two radio buttons: 'Apply one tab visibility to all profiles' (selected) and 'Apply a different tab visibility for each profile'. A table lists user profiles on the left and their tab visibility settings on the right. Most profiles have 'Default On' selected. The table includes profiles like Analytics Cloud Integration User, Analytics Cloud Security User, Authenticated Website, etc., down to System Administrator.

New Lightning App New Connected App

The screenshot shows the Salesforce Setup interface with the 'Tabs' page selected. The top navigation bar includes 'Setup', 'Home', 'Object Manager', and a search bar. The left sidebar has sections for 'User Interface' and 'Rename Tabs and Labels', with 'Tabs' currently selected. A message at the top says 'Didn't find what you're looking for? Try using Global Search.' The main content area is titled 'Custom Tabs' and contains sections for 'Custom Object Tabs', 'Web Tabs', 'Visualforce Tabs', 'Lightning Component Tabs', and 'Lightning Page Tabs'. The 'Custom Object Tabs' section lists five tabs with their labels and tab styles:

Action	Label	Tab Style	Description
Edit Del	Book1	Box	
Edit Del	CDepartments	Lightning	
Edit Del	colleges	Jewel	
Edit Del	Research Proposal	Square	
Edit Del	student	Box	

The other sections show that no Web, Visualforce, Lightning Component, or Lightning Page tabs have been defined.

Conclusion:

Now, whenever you create or update a record in the "Department_c" related to a "College_c," the "TotalCount_c" field on the "College_c" will automatically update to show the total number of related records.

Remember to add just field-level security, validation rules, and page layouts as needed to ensure that your custom objects and fields are appropriately configured for your organization's requirements.

Last Modified By: krishna s., 01/10/2023, 11:19 am

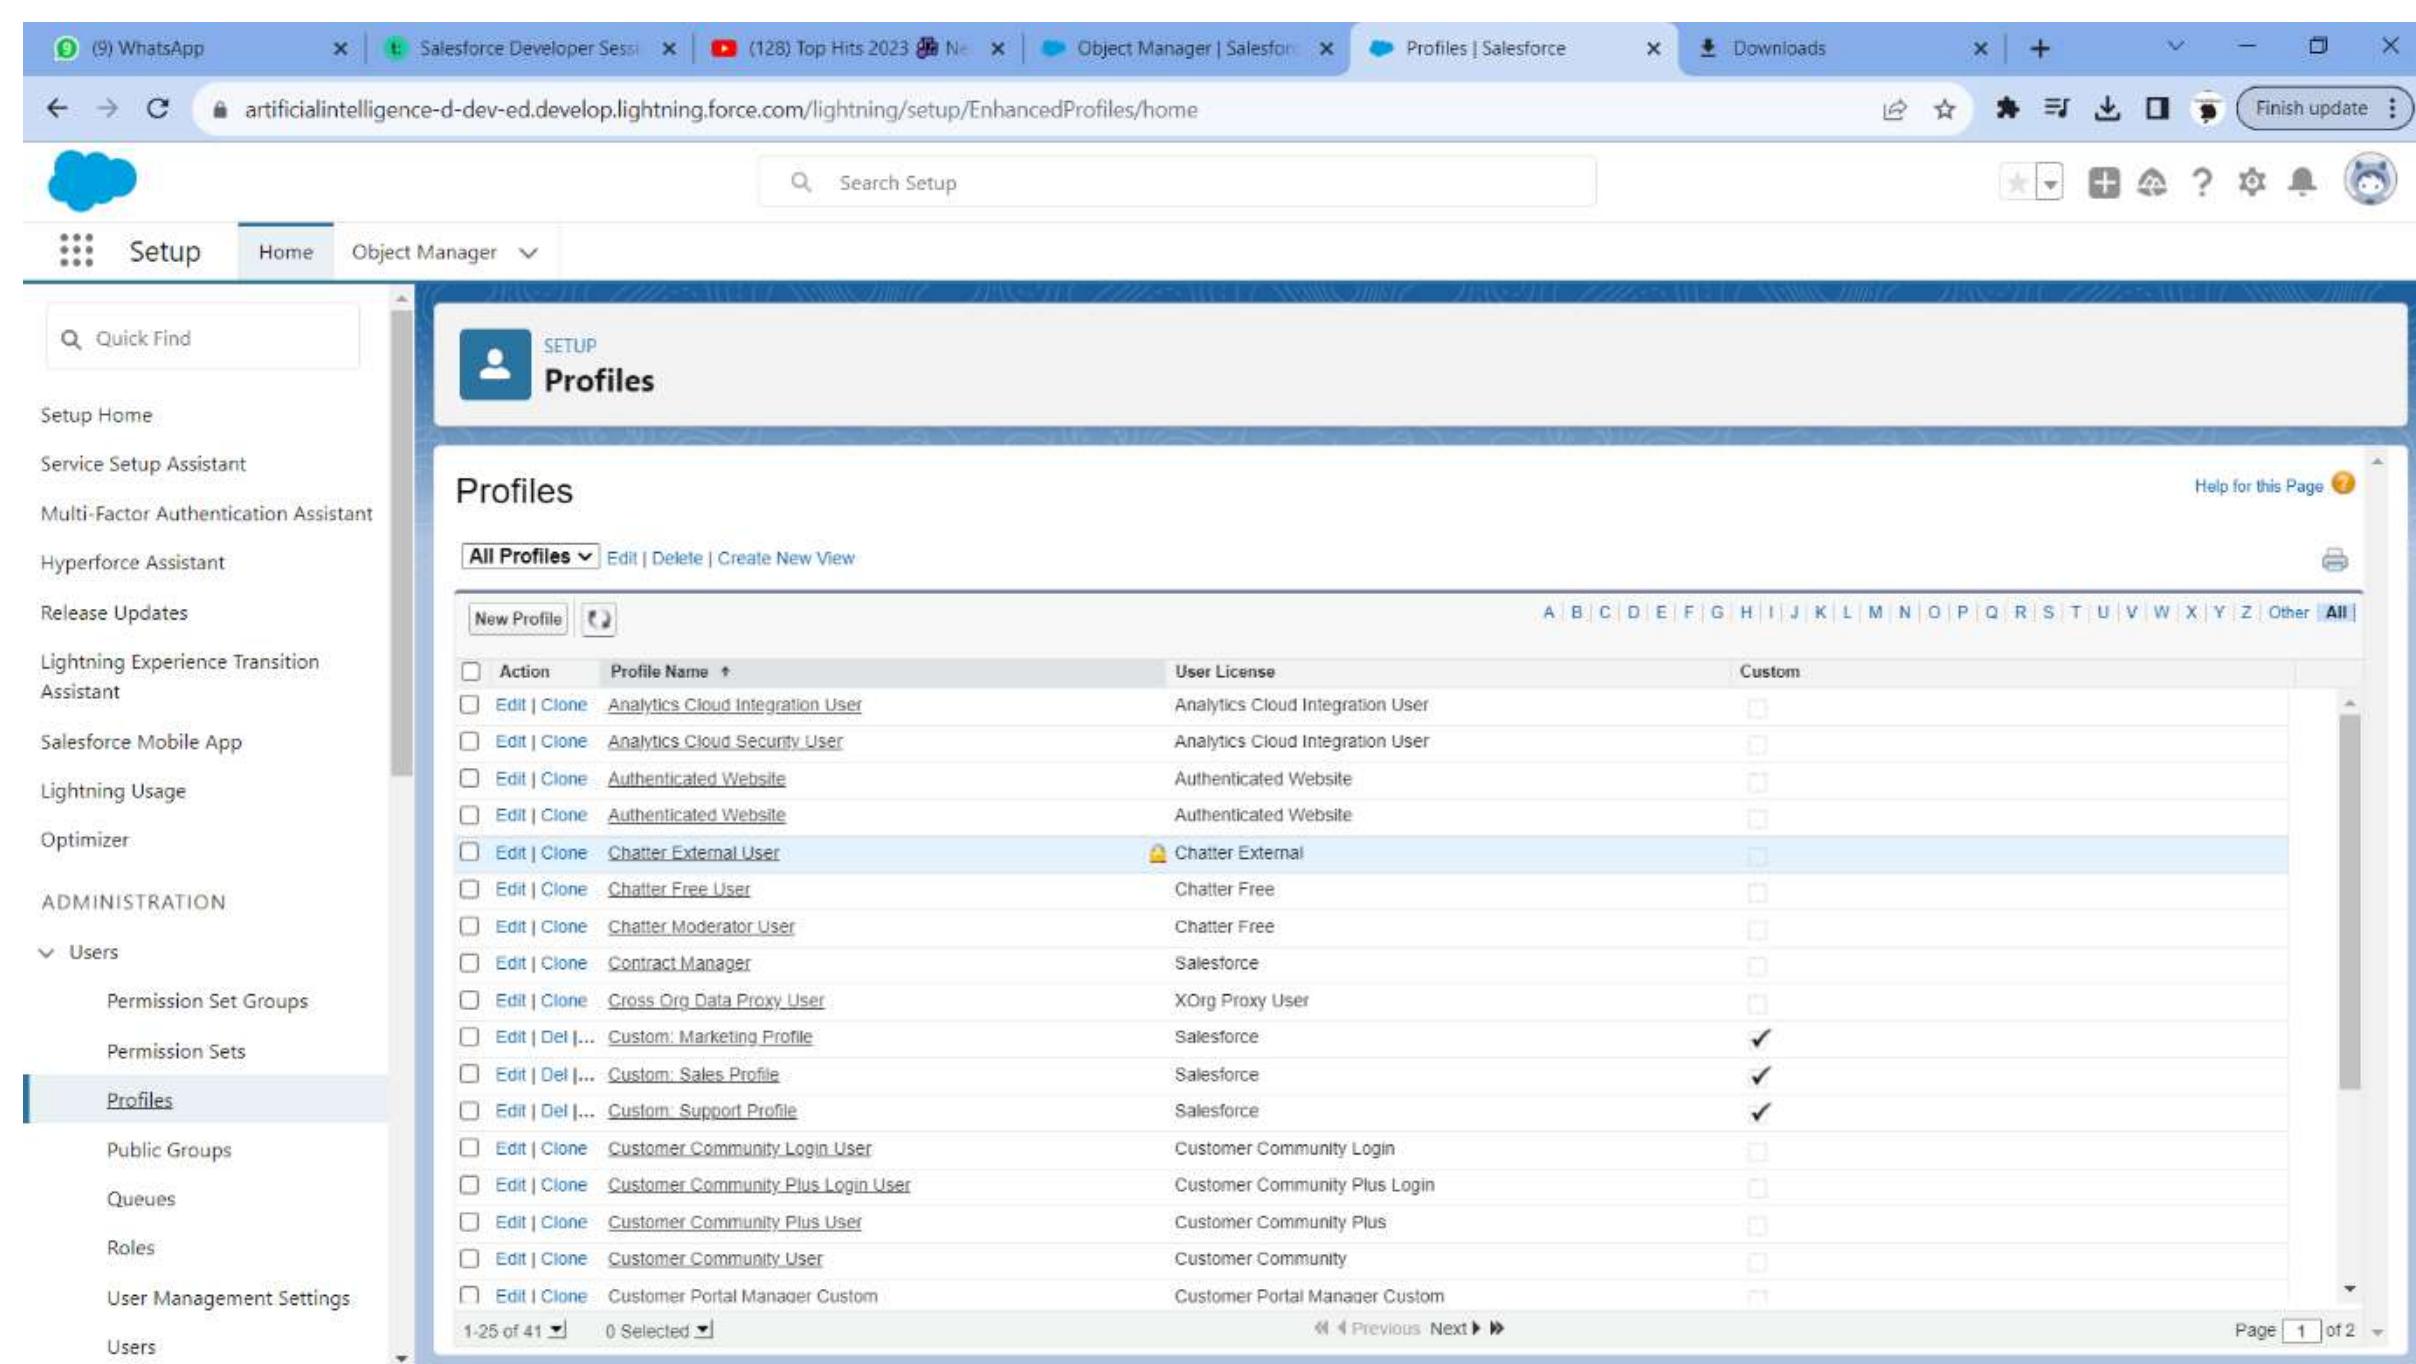

History

This screenshot shows a CRM application interface for managing college records. The main title is 'MECW'. The top navigation bar includes links for 'My college', 'colleges', 'CDepartments', 'student', and 'Content'. A search bar is located at the top right. Below the header, there's a toolbar with icons for star, plus, document, question mark, settings, and notifications. The main content area displays a 'Details' tab for the college 'mecw'. The 'Related' tab is also visible. The 'Details' tab contains fields for college name ('mecw'), total count (2), phone number ('9087116402'), email ('kiot@gmail.com'), and location ('90, 80'). It also shows creation and modification history, both attributed to 'krishna s.' on '01/10/2023, 11:16 am' and '01/10/2023, 11:19 am' respectively. At the bottom left, there's a link to 'History'.

2. If there is 2 user, User A and User B in the organisation and we want in Account object that User A should not see the User B Record and user B should not see User A record then apply the Security for the users.

Solution:

Step 1: Create two separate custom profiles, one for User A and one for User B.

The screenshot shows the Salesforce Setup interface with the 'Profiles' tab selected under 'Object Manager'. The main area displays a table of profiles, each with an 'Action' column containing options like 'Edit | Clone' and 'Delete'. The columns include 'Profile Name', 'User License', and 'Custom'. The 'User License' column includes links to 'Analytics Cloud Integration User', 'Analytics Cloud Security User', 'Authenticated Website', 'Chatter External', 'Chatter Free', 'Chatter Moderator', 'Contract Manager', 'Cross Org Data Proxy User', 'Marketing Profile', 'Sales Profile', 'Support Profile', 'Customer Community Login User', 'Customer Community Plus Login User', 'Customer Community Plus User', 'Customer Community User', and 'Customer Portal Manager Custom'. The 'Custom' column has checkboxes, some of which are checked for certain profiles. The bottom of the page shows pagination with '1-25 of 41' and '0 Selected'.

Help for this Page

The screenshot shows a web browser window with two tabs open:

- Salesforce Developer Session**: This tab displays the Salesforce Setup interface under the "Users" section. It shows the "User Detail" for a user named "sowmiya bala". The user's email is listed as "2k20cse179@kiot.ac.in [Verify]". The "Role" section indicates "Salesforce Platform Manager". Other details include "Active" checked, "Marketing User", "Offline User", "Knowledge User", "Flow User", "Service Cloud User", "Site.com Contributor User", "Site.com Publisher User", "WDC User", "Mobile Push Registrations", "Data.com User Type", "Accessibility Mode (Classic Only)", "Debug Mode", "High-Contrast Palette on Charts", "Load Lightning Pages While Scrolling" checked, and "Salesforce CRM Content User" checked.
- Gmail**: This tab shows the Gmail inbox. The inbox contains 5,318 messages. A message from "support@salesforce.com" is selected, with the subject "Welcome to Salesforce!". The message body includes a "Verify Account" button, a URL (<https://artificialintelligence-d-dev-ed.develop.my.salesforce.com>), and the username "2k21it@kiot.ac.in".

List View

The screenshot displays two screenshots of the Salesforce Lightning interface. The top screenshot shows the 'New customer' creation screen with fields for 'customer Name' (madhu) and 'Bank' (boi). The bottom screenshot shows the 'customer madhu' detail page, which includes the same information and a success message: 'customer "madhu" was created.' The interface is in dark mode with a blue header.

The screenshot shows two views of the Salesforce Setup interface. The top view displays the 'Profiles' page under the 'Profiles' tab in the 'SETUP' header. The left sidebar shows navigation options like 'Setup Home', 'Service Setup Assistant', etc., with 'Profiles' selected. The main content area lists profiles with columns for Action, Profile Name, User License, and Custom status. The 'salesmanager' profile is highlighted. The bottom view shows a 'Clone Profile' dialog box. It prompts the user to enter the name of the new profile and specifies that an existing profile must be selected. The 'Existing Profile' dropdown is set to 'Standard Platform User'. The 'User License' is listed as 'Salesforce Platform'. The 'Profile Name' field contains 'salesmanager'. At the bottom of the dialog are 'Save' and 'Cancel' buttons.

The screenshot shows the Salesforce Setup interface with the 'Profiles' page selected. The left sidebar includes links for Setup Home, Service Setup Assistant, Multi-Factor Authentication Assistant, Hyperforce Assistant, Release Updates, Lightning Experience Transition Assistant, Salesforce Mobile App, Lightning Usage, Optimizer, and Administration (with sub-links for Users, Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings, and Users). The main content area displays the 'salesmanage' profile details, including its name, user license, description, and creation/modification history. It also lists various standard object layouts and their assignments across different components like Global, Email Application, Home Page Layout, Account, Alternative Payment Method, Appointment Invitation, and Asset.

The screenshot shows the Salesforce Setup interface with the following details:

- Header:** The URL is artificialintelligence-d-dev-ed.lightning.force.com/lightning/setup/EnhancedProfiles/page?address=%2F00e5j00000WQCE%2Fe%3FretURL%3D%252F0.... The browser tabs include WhatsApp, Salesforce Developer Session 2, Top Hits 2023, Profiles | Salesforce, and Welcome to Salesforce.
- Page Title:** SETUP Profiles
- Profile Edit:** salesmanage
- Description:** Set the permissions and page layouts for this profile.
- Profile Edit Form:**
 - Name: salesmanage
 - User License: Salesforce Platform
 - Description: (empty)
 - Custom Profile:
- Custom App Settings:** A table showing visibility and default status for various apps.

App	Visible	Default
Analytics Studio (standard_Insights)	<input type="checkbox"/>	<input checked="" type="radio"/>
App Launcher (standard_AppLauncher)	<input type="checkbox"/>	<input checked="" type="radio"/>

Help for this Page

The screenshot shows the Salesforce Setup interface with the 'Users' page open. The left sidebar navigation includes 'Setup', 'Home', 'Object Manager', and a search bar. Under 'Users', the 'User Management Settings' section is expanded, showing 'Users' as the active tab. Other sections like 'Feature Settings', 'Data.com', 'Prospector Users', 'Service', 'Embedded Service', and 'User Interface' are also listed. The main content area displays the 'Users' configuration page with sections for 'Mailing Address', 'Single Sign On Information', 'Locale Settings', and 'Approver Settings'. The 'Mailing Address' section contains fields for Street, City, Zip/Postal Code, State/Province, and Country. The 'Single Sign On Information' section has a 'Federation ID' field. The 'Locale Settings' section shows Time Zone set to '(GMT+05:30) India Standard Time (Asia/Kolkata)', Locale set to 'English (India)', and Language set to 'English'. The 'Approver Settings' section includes fields for 'Delegated Approver' and 'Manager', and a dropdown for 'Receive Approval Request Emails' set to 'Only if I am an approver'. A checkbox for 'Generate new password and notify user immediately' is checked. At the bottom are 'Save', 'Save & New', and 'Cancel' buttons.

The screenshot shows a web browser with two tabs open:

- Salesforce Developer Session 2**: This tab displays the Salesforce Setup interface under the "Users" section. A user named "madhu b" is selected. The "User Detail" page shows various profile information, including Name (madhu b), Alias (mb), Email (2k20cse179@kiot.ac.in), Username (2k20csit@kiot.ac.in), Nickname (User16961684242865419206), Title (worker), Company (kiot bank), Department (Sales), Division (4/194, anyampalayam, uthamasolapuram, Paraikkadu, salem- 636308 SALEM 636308 TAMIL NADU), Time Zone (GMT+05:30) India Standard Time (Asia/Kolkata), Locale (English (India)), Language (English), and Profile (salesmanag). Other tabs like Edit, Sharing, Reset Password, Login, and Freeze are visible.
- Gmail**: This tab shows the Gmail inbox. The inbox contains 5,318 messages. A welcome message from Salesforce is highlighted, reading: "Welcome to Salesforce! Click below to verify your account. Verify Account To easily log in later, save this URL: https://artificialintelligence-d-dev-ed.develop.my.salesforce.com Username: 2k20csit@kiot.ac.in Again, welcome to Salesforce!"

https://artificialintelligence-d-dev-ed.develop.lightning.force.com/one/one.app#/setup/PermSets/home

Step 2:

Permission Sets:

- Create two permission sets, one for User A and one for User B.

Object-Level Security:

- In each profile and permission set, set the object-level security for the Account object to "Read" to ensure that both User A and User B can view Account records.

Record-Level Security:

- Implement record-level security using Criteria-Based Sharing Rules.
- Create a sharing rule that shares Account records owned by User A with User A and records owned by User B with user B.
- For the sharing rule criteria, specify that records owned by User A are shared with user

User A, and records owned by User B are shared with User B.

Ownership:

- Ensure that the Account records are owned by the respective users, with User A owning their records and User B owning their records.

Organization-Wide Defaults:

- Set the organization-wide defaults for the Account object to "Private" to ensure that records are private by default.

Testing:

- Test the setup by logging in as User A and User B separately to verify that they cannot access each other's records.

customer Name

You haven't viewed any customers recently.
Try switching list views.

LIST VIEW CONTROLS

- New
- Clone
- Rename
- Sharing Settings
- Show List Filters
- Select Fields to Display
- Delete
- Reset Column Widths

javascript:void(0)

The screenshot shows a Salesforce Lightning interface. At the top, there's a navigation bar with tabs for 'Recently Viewed', 'customers', and 'Bank'. Below that is a search bar. The main content area is titled 'Recently Viewed' and shows a single column for 'customer Name'. A message at the bottom says 'You haven't viewed any customers recently. Try switching list views.' On the right side, there's a 'LIST VIEW CONTROLS' sidebar with options like 'New', 'Clone', 'Rename', 'Sharing Settings', 'Show List Filters', 'Select Fields to Display', 'Delete', and 'Reset Column Widths'. The browser's address bar displays the URL 'artificialintelligence-d-dev-ed.develop.lightning.force.com/lightning/o/customer_c/list?filterName=Recent'. The bottom of the page has a small 'javascript:void(0)' placeholder.

3.. Suppose there are 2 Users and they are having Create, Read, Edit access on Account Object with the same profile but we want to open up the access for one user to delete how will you implement the Security setting.

Solution:

Step 1: we need create a profile for the two user which has the access to Create, Read, Edit for follow as per.

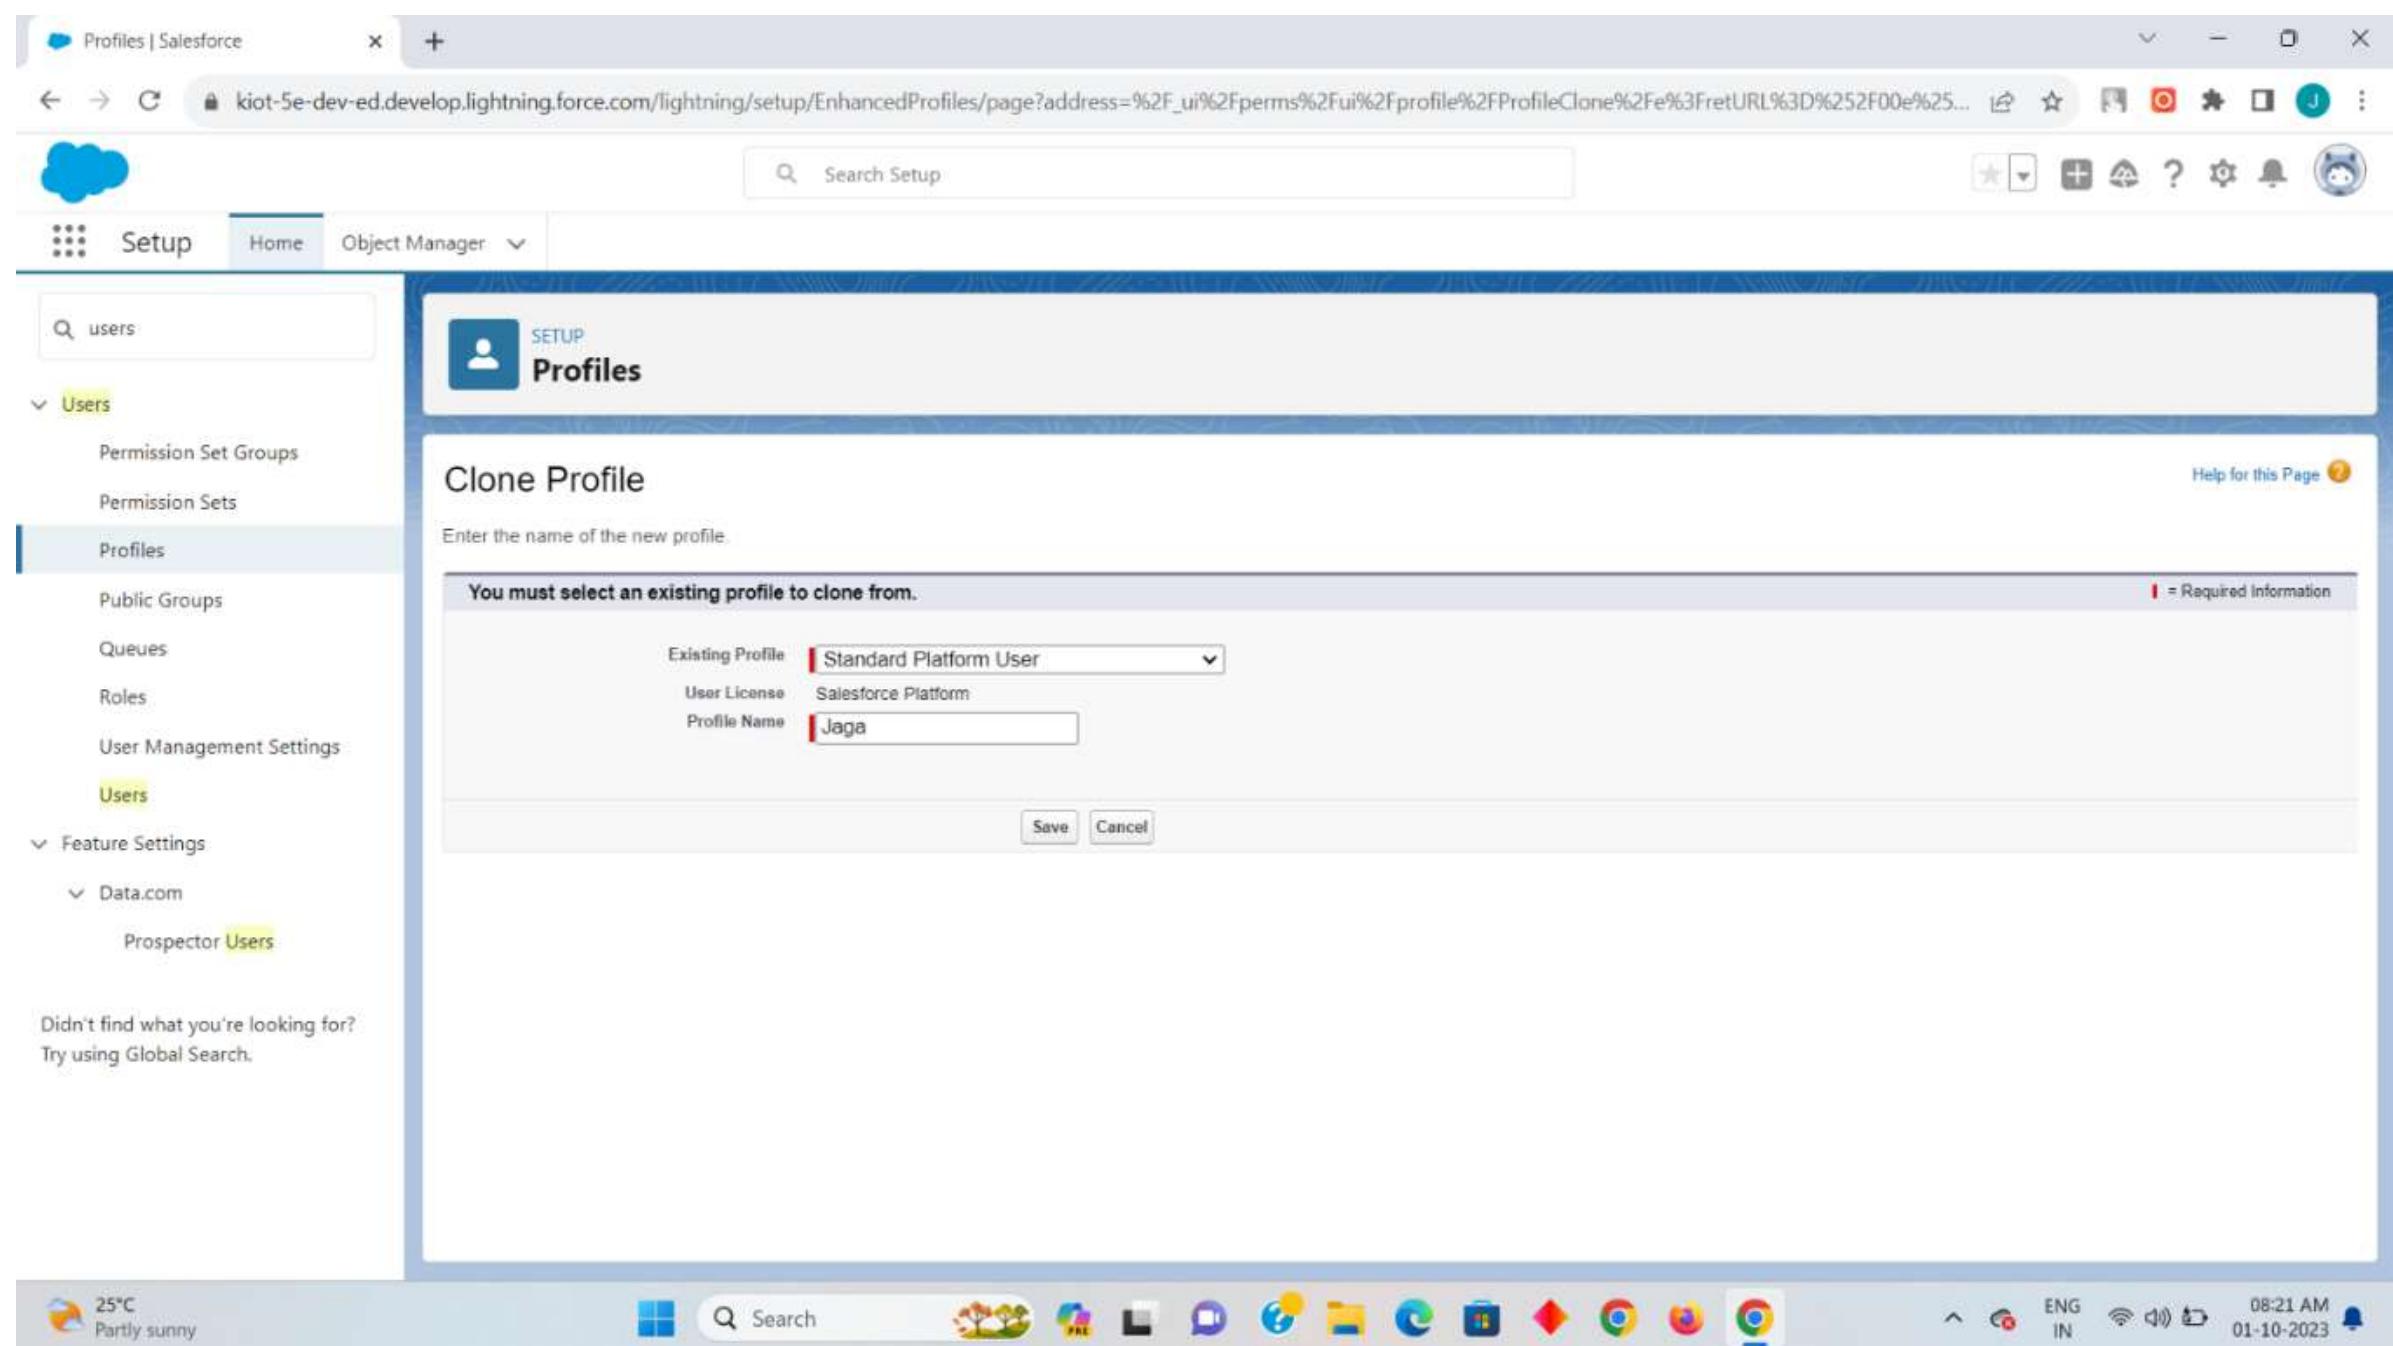

Setup-quick search[profile]

The screenshot shows the Salesforce Setup interface with the following details:

- Page Title:** Profiles | Salesforce
- URL:** kiot-5e-dev-ed.develop.lightning.force.com/lightning/setup/EnhancedProfiles/page?address=%2F00e%3FisDeleteRedirect%3Dtrue%26setupid%3DEnhancedProfiles
- Header:** Search Setup
- Left Sidebar:** Setup, Home, Object Manager, a search bar with 'users', and a tree view with 'Users' expanded, showing 'Permission Set Groups', 'Permission Sets', 'Profiles' (selected), 'Public Groups', 'Queues', 'Roles', 'User Management Settings', 'Users' (selected), 'Feature Settings', and 'Data.com'.
- Main Content:** The 'Profiles' page with the title 'Profiles'. It shows a table of profiles with columns: Action, Profile Name, User License, and Custom. The table lists various profiles like 'Analytics Cloud Integration User', 'Authenticated Website', 'Chatter External User', etc. A navigation bar at the bottom shows '1-25 of 41' and '0 Selected'.
- Bottom:** A Windows taskbar with icons for File Explorer, Edge, and other applications, along with system status indicators like battery level, signal strength, and date/time (01-10-2023).

Step 2:

Click on the new to create a new profile along with the label and Api

Here I had made it my profile name as Jaga and the existing profile as Standard Platform User.

Step 3:

Now click on the edit and scroll down to custom object settings and enable the read, create, edit and view options. After that click on save.

The screenshot shows the Salesforce Setup interface with the URL <https://kiot-5e-dev-ed.lightning.force.com/lightning/setup/EnhancedProfiles/page?address=%2F00e5j00000WQ2O%3Fsetupid%3DEnhancedProfiles>. The left sidebar is expanded, showing sections like Users, Feature Settings, and Data.com. The main content area is titled 'Profile Jaga'. It displays the profile's name, license, and creation details. Below this is a table for 'Page Layouts' across various standard objects. The 'Alternative Payment Method' row has its 'View Assignment' checkbox checked. At the bottom right of the main content area is a 'Help for this Page' link.

This screenshot continues from the previous one, showing the 'Profiles' page. The 'Custom Object Permissions' section is visible, with two tables for 'Basic Access' and 'Data Administration' permissions. The 'Read', 'Create', 'Edit', 'Delete', 'View All', and 'Modify All' checkboxes are all checked. The 'Session Settings' section below includes fields for 'Session Times Out After' (set to '2 hours of inactivity'), 'Session Security Level Required at Login' (set to 'None'), and several checkboxes for login policies. The left sidebar remains the same, showing the expanded 'Users' section.

Tab Settings

Overwrite users' personal tab customizations:

ENG IN 08:21 AM 01-10-2023

Step 4

Now you can preview your created profile on the profile option here my profile name jaga has been created with the access of read, create, edit along with view on it

The screenshot shows the Salesforce Setup interface for managing Profiles. The left sidebar is collapsed, and the main content area is titled 'Profiles'. A sub-header 'All Profiles' is visible above a table. The table has columns for 'Action', 'Profile Name', 'User License', and 'Custom'. Two profiles are listed: 'Jaga' (Salesforce Platform User License) and 'Jagadesh' (Analytics Cloud Integration User User License). Both profiles have checkboxes for 'Edit | Del ...' and 'Edit | Del ...' checked. The bottom of the page shows navigation links like '1-2 of 2', '0 Selected', and 'Page 1 of 1'.

Action	Profile Name	User License	Custom
<input type="checkbox"/> Edit Del ...	Jaga	Salesforce Platform	<input checked="" type="checkbox"/>
<input type="checkbox"/> Edit Del ...	Jagadesh	Analytics Cloud Integration User	<input checked="" type="checkbox"/>

Step 5:

Now create two users by enter into the Setup-quick search[user] and then click on new user after clicking that you need to create two user along with the profile as Taga which we have created on the step 2. once the one user has been created click on the save & new so that you can create the second user and there the username can be created with alternate name but with the same user profile and once the two user are created click on save.

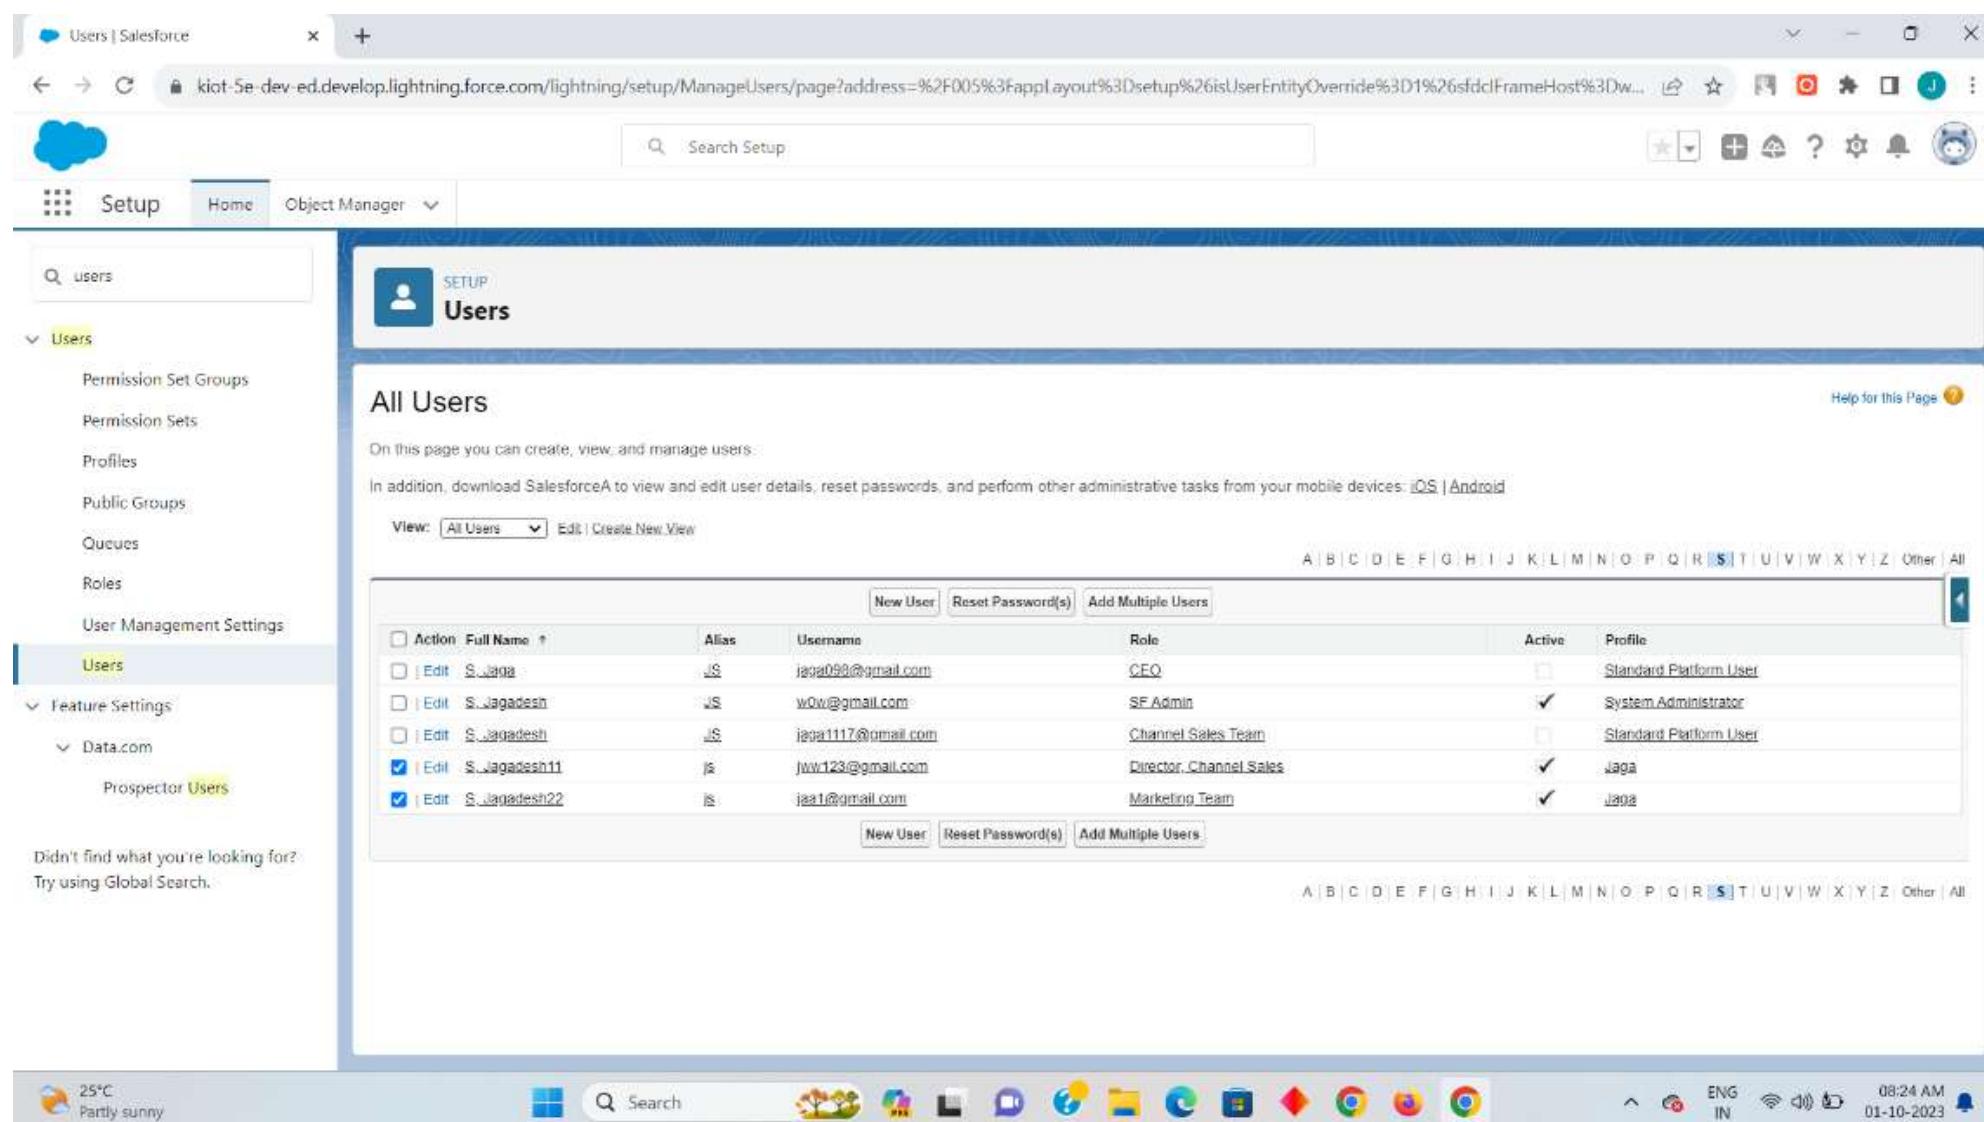

The screenshot shows the Salesforce Setup interface with the following details:

- Header:** The title bar displays "Users | Salesforce" and the URL "kiot-5e-dev-ed.lightning.force.com/lightning/setup/ManageUsers/home".
- Left Sidebar:** The sidebar includes a "Cloud" icon, a search bar with "Search Setup", and navigation tabs for "Setup", "Home", and "Object Manager". A sidebar menu lists "Permission Set Groups", "Permission Sets", "Profiles", "Public Groups", "Queues", "Roles", "User Management Settings", and "Feature Settings". The "Users" section under "User Management Settings" is currently selected.
- Central Content:** The main area is titled "All Users" and contains the following information:
 - A message: "On this page you can create, view, and manage users."
 - A note: "In addition, download SalesforceA to view and edit user details, reset passwords, and perform other administrative tasks from your mobile devices: [iOS](#) | [Android](#)".
 - A "View:" dropdown set to "All Users" with options "Edit" and "Create New View".
 - A navigation bar with letters A through Z and a "All" link.
 - A table listing users with columns: Action, Full Name, Alias, Username, Role, Active, and Profile. The table includes the following rows:

Action	Full Name	Alias	Username	Role	Active	Profile
<input type="checkbox"/> Edit	Chatter Expert	Chatter	chatty.00d5j00000c8jpseaf.6z9bkrrkd4i@chatter.salesforce.com		<input checked="" type="checkbox"/>	Chatter Free User
<input type="checkbox"/> Edit	Grey_Jane	jgrey	jane_gray.fygnimmoaim.cz7d2kiogtn3@gmail.com		<input checked="" type="checkbox"/>	Customer Community User
<input type="checkbox"/> Edit	S_Jaga	JS	jaga098@gmail.com	CEO	<input type="checkbox"/>	Standard Platform User
<input type="checkbox"/> Edit	S_Jagadesh	JS	w0w@gmail.com	SF Admin	<input checked="" type="checkbox"/>	System Administrator
<input type="checkbox"/> Edit	S_Jagadesh	JS	jaga1117@gmail.com	Channel Sales Team	<input type="checkbox"/>	Standard Platform User
<input type="checkbox"/> Edit	User_Integration	Integ	integration@00d5j00000c8jpseaf.com		<input checked="" type="checkbox"/>	Analytics Cloud Integration User
<input type="checkbox"/> Edit	User_Security	sec	insightssecurity@00d5j00000c8jpseaf.com		<input checked="" type="checkbox"/>	Analytics Cloud Security User
 - Buttons at the bottom of the table: "New User", "Reset Password(s)", and "Add Multiple Users".
 - A navigation bar with letters A through Z and a "All" link at the bottom right.
- Bottom Taskbar:** Includes icons for Weather (25°C), Search, File Explorer, Task View, and several browser tabs (Chrome, Edge, Firefox).
- System Icons:** Shows battery level, signal strength, and system status.
- Page Footer:** Displays the date "01-10-2023" and time "08:22 AM".

The screenshot shows the Salesforce Setup interface for creating a new user. The left sidebar is titled 'Users' and includes options like Permission Set Groups, Permission Sets, Profiles, Public Groups, Queues, Roles, User Management Settings, Feature Settings, Data.com, and Prospector Users. The main area is titled 'New User' and contains a 'User Edit' form with tabs for General Information, Advanced Settings, and Profile. The 'General Information' tab is active, showing fields for First Name (Jagadesh11), Last Name (S), Alias (js), Email (jww123@gmail.com), Username (jww123@gmail.com), Nickname (User169612875144962592), Title, Company, Department, and Division. To the right, there are dropdown menus for Role (Director, Channel Sales), User License (Salesforce Platform), Profile (None), Active (Jaga, selected), Marketing User (Standard Platform User), Offline User, Knowledge User, Flow User, Service Cloud User, Site.com Contributor User, Site.com Publisher User, WDC User, Data.com User Type (None), Data.com Monthly Addition Limit (Default Limit (300)), Accessibility Mode (Classic Only), and High-Contrast Palette on Charts. A search bar at the top right says 'Search Setup'.

The screenshot shows the Salesforce Setup interface with the 'Users' tab selected. A search bar at the top right contains the text 'Search Setup'. The left sidebar has 'Users' expanded, with 'Users' highlighted in yellow. The main area is titled 'New User' under 'User Edit'. The 'General Information' section contains fields for First Name (Jagadesh22), Last Name (S), Alias (js), Email (jaa1@gmail.com), Username (jaa1@gmail.com), Nickname (User169612879983618745), Title, Company, Department, and Division. To the right of these fields are dropdown menus for Role (Marketing Team), User License (Salesforce Platform), Profile (None), Active (Jaga, selected), Marketing User (Standard Platform User), Offline User (unchecked), Knowledge User (unchecked), Flow User (unchecked), Service Cloud User (unchecked), Site.com Contributor User (unchecked), Site.com Publisher User (unchecked), WDC User (unchecked), Data.com User Type (None), Data.com Monthly Addition Limit (Default Limit (300)), Accessibility Mode (Classic Only) (unchecked), and High-Contrast Palette on Charts (unchecked). At the bottom right of the form are 'Save', 'Save & New', and 'Cancel' buttons.

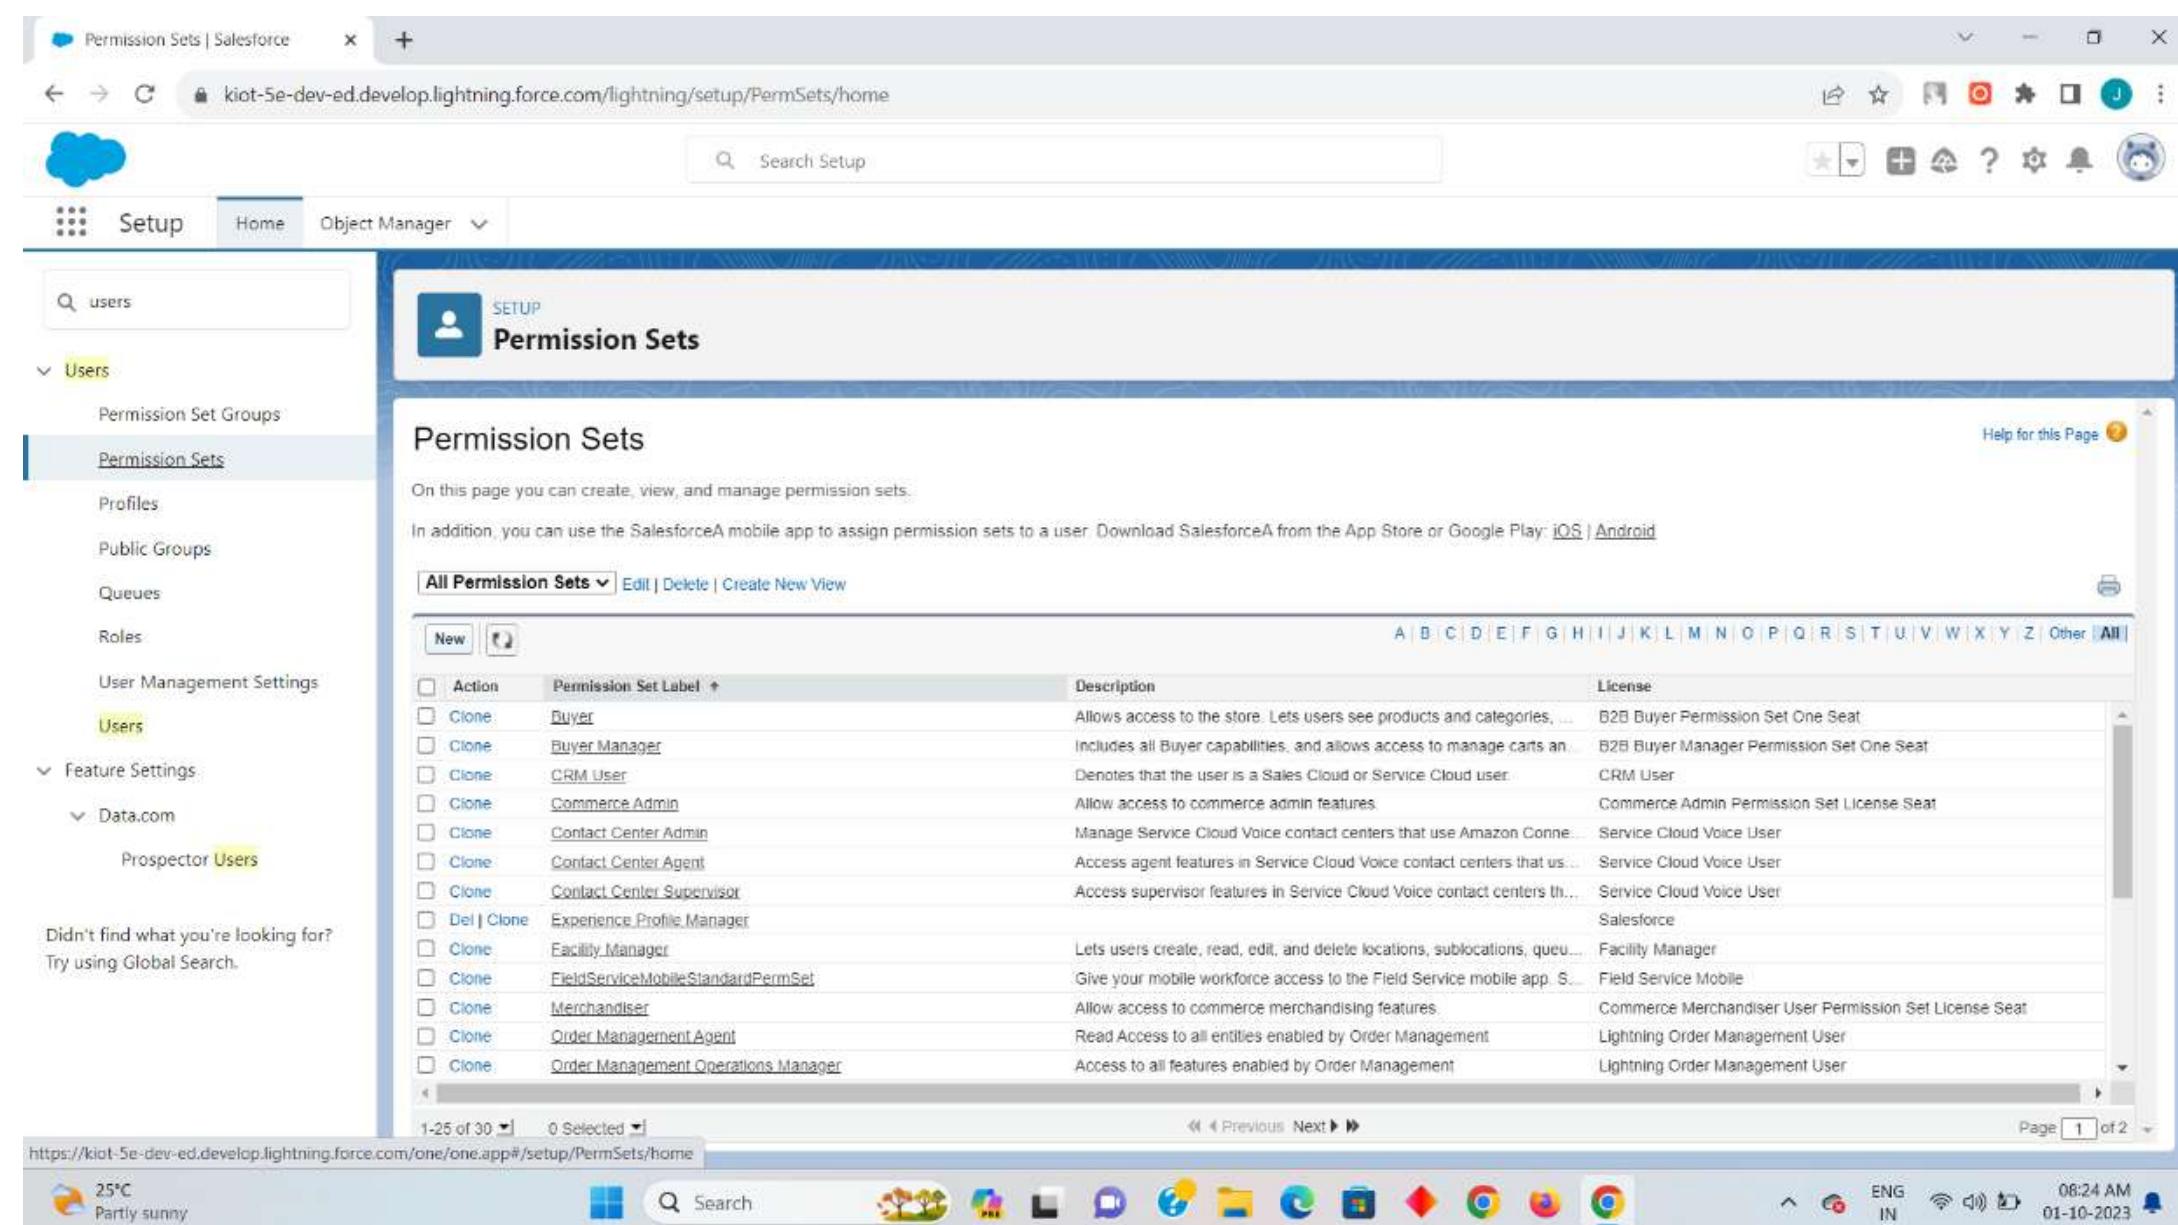

Now you can preview your two user that you have created in my side I had create the two users a Tagadesh11 and Tagadesh22 as a director channel sales with the marketing team.

Step 6:

Now the two user has been created with the profile so that two user can perform the Create, Read, Edit and view on both the user. So as per the given task we need to allocate a specific access as delete on one user for that we need create a permission set for one user so it can created as

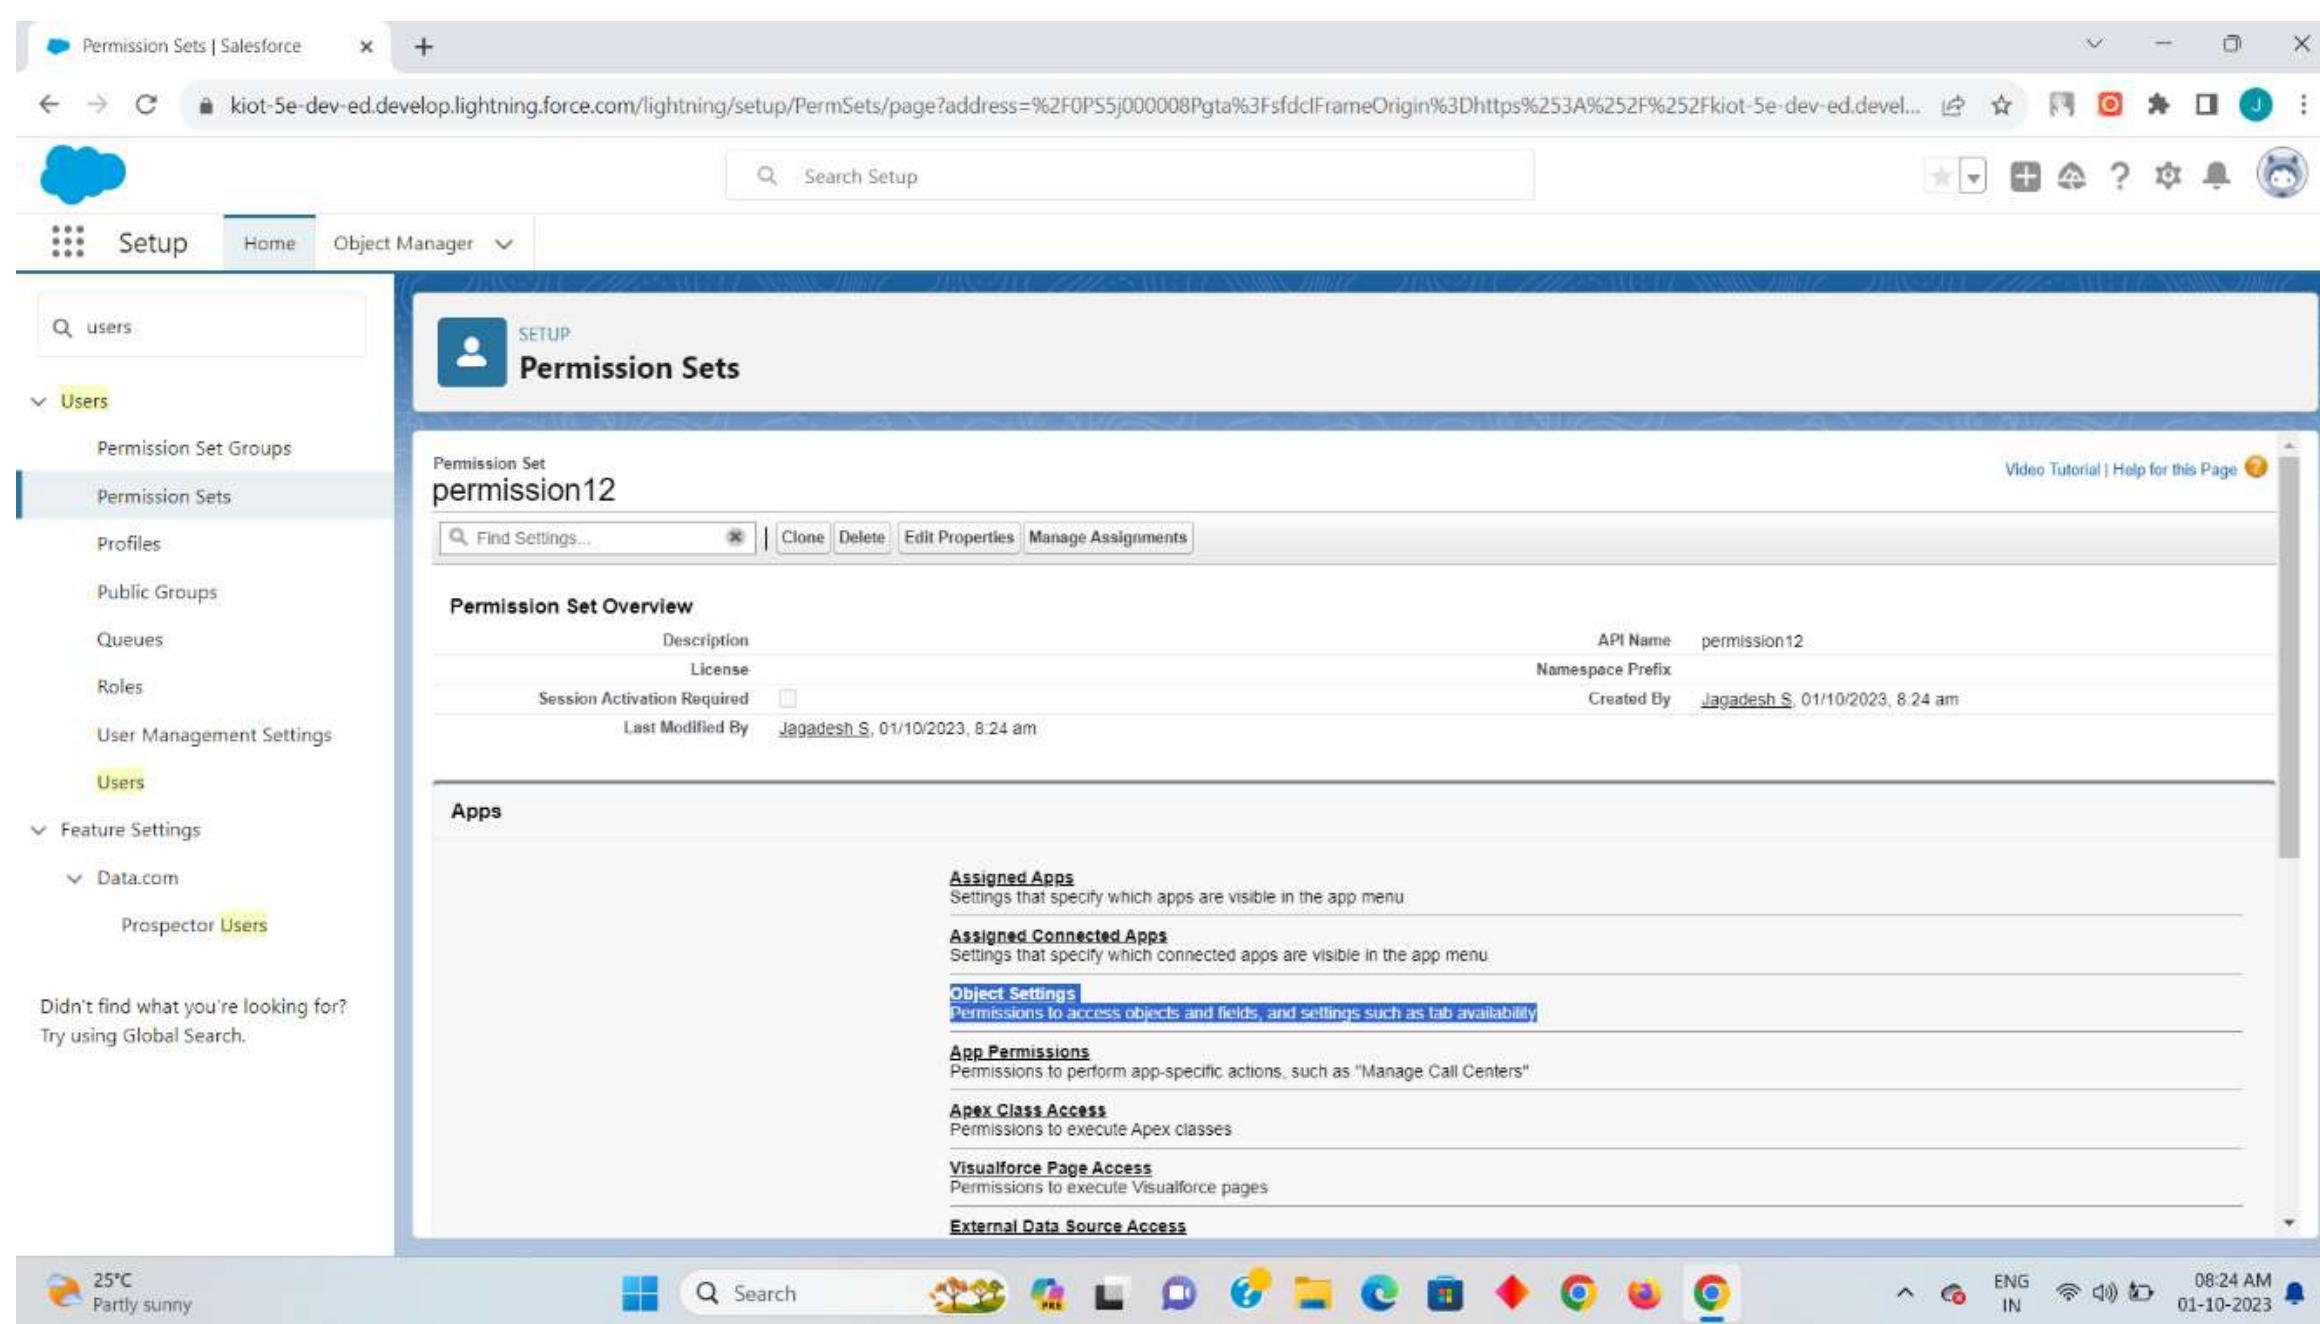

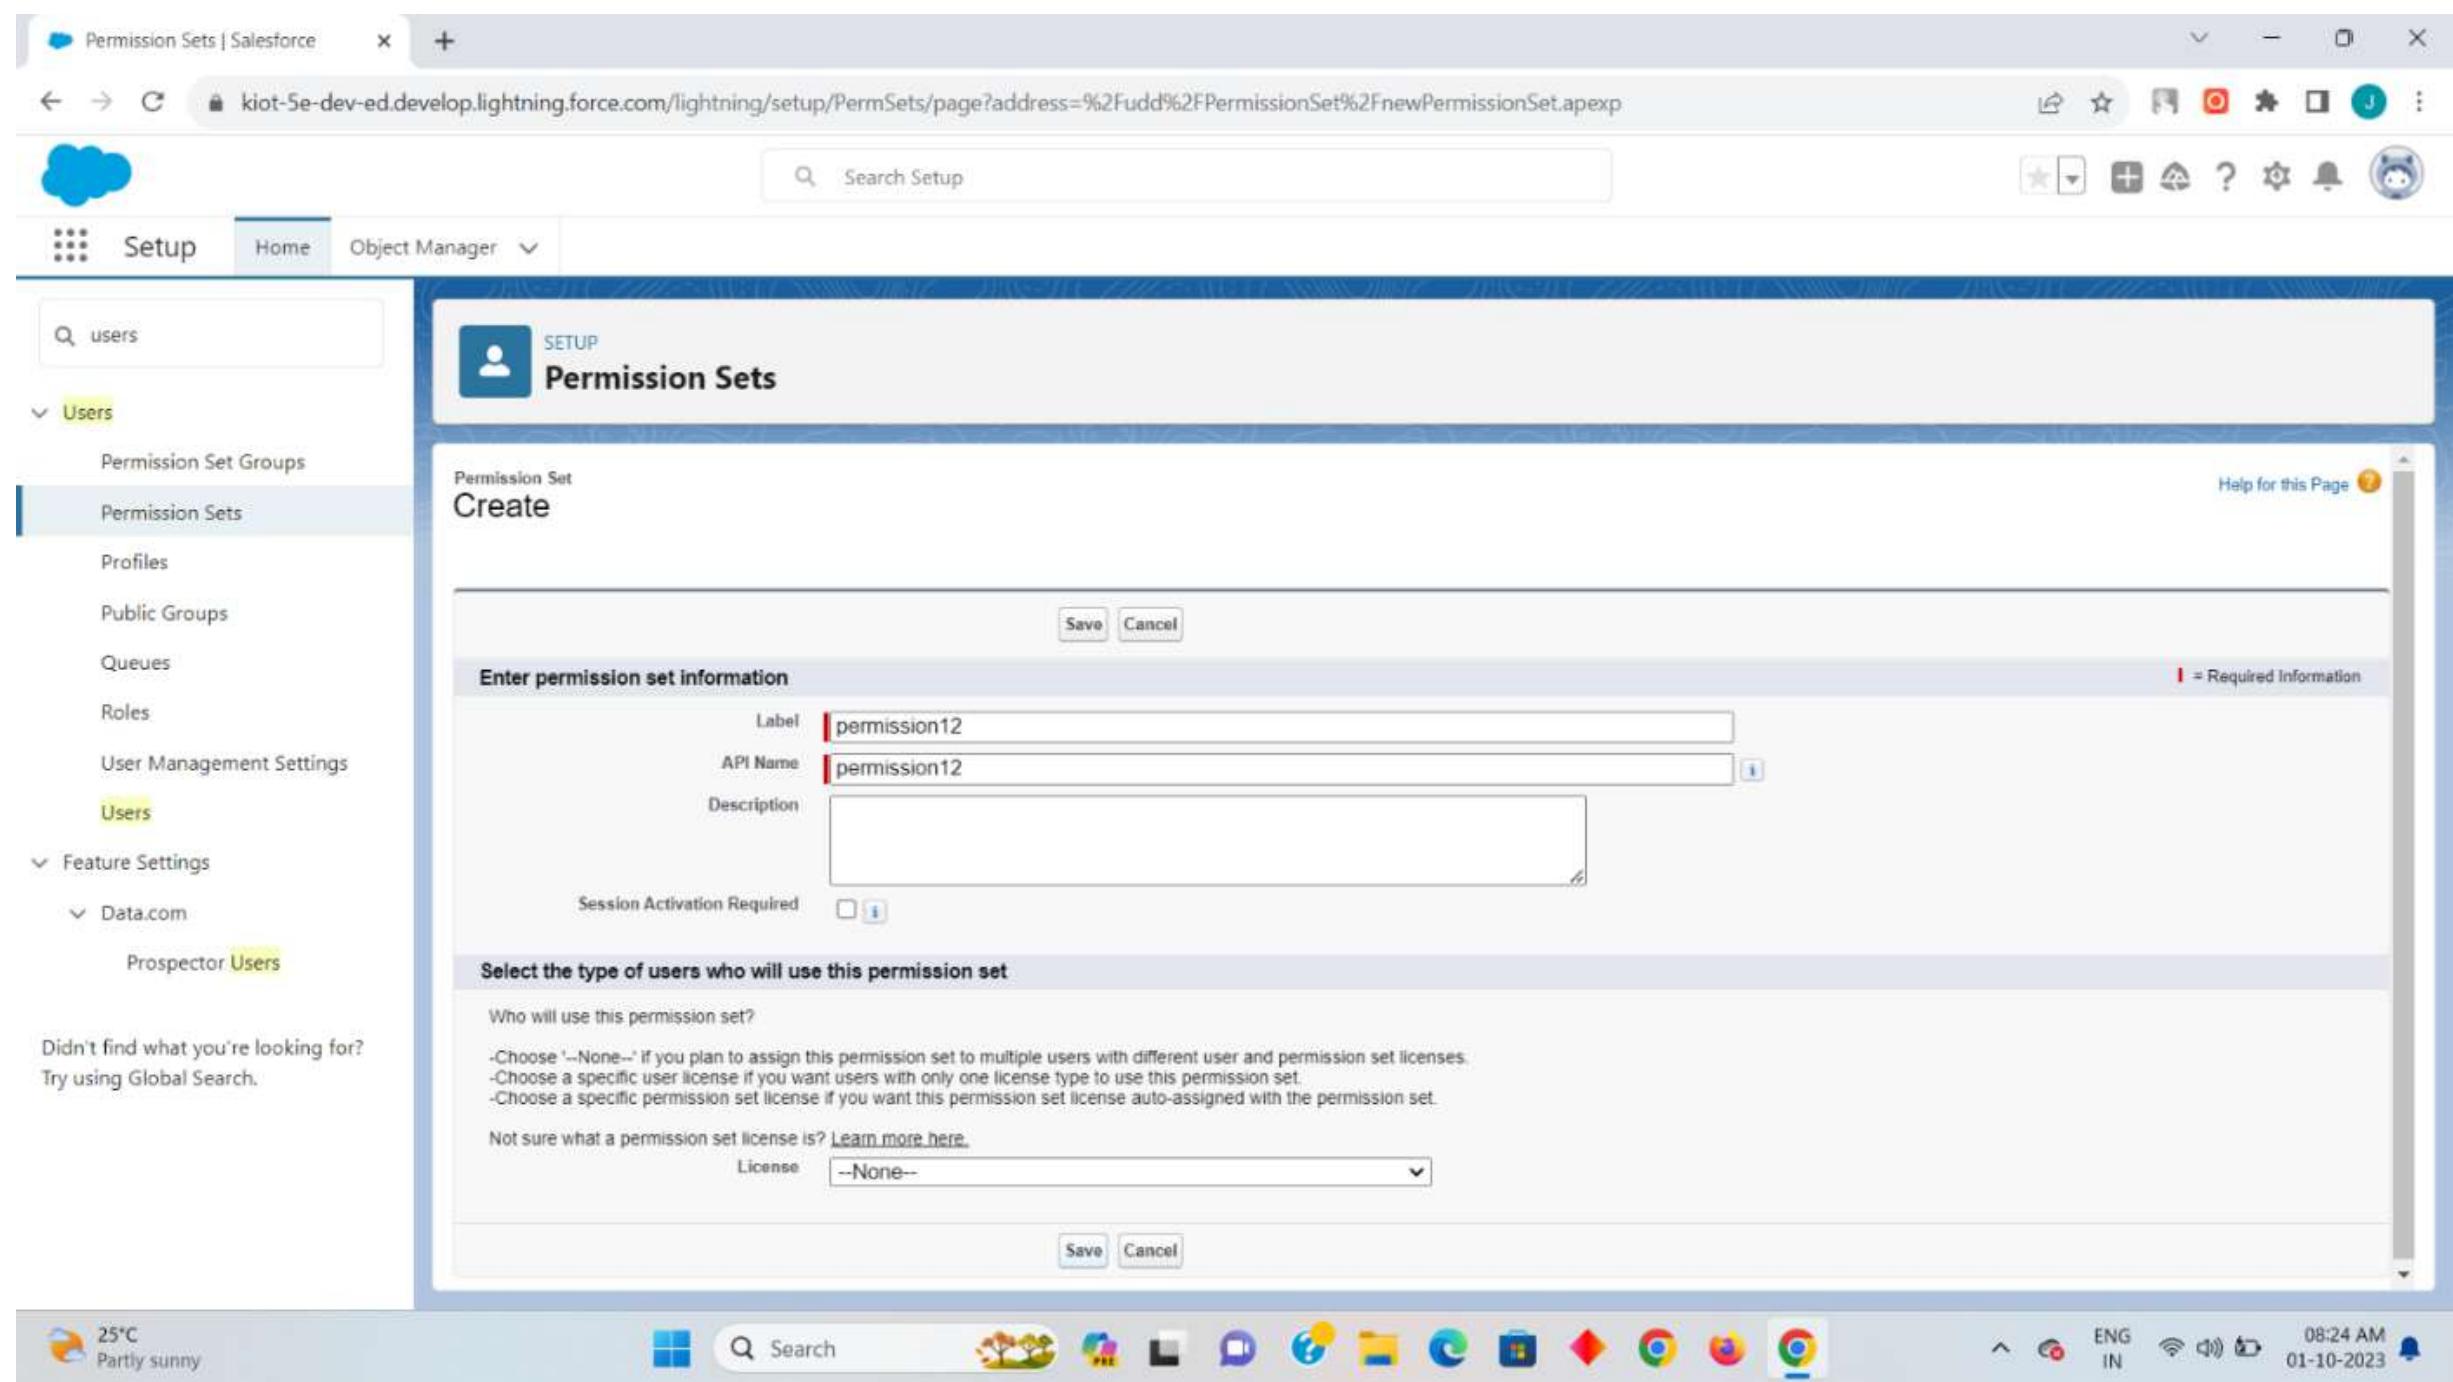

setup-quick search[permission set]-new-fill

label name [auto select the API name]-click on save-object settings-accounts.

The screenshot shows the Salesforce Setup interface for managing Permission Sets. The left sidebar is collapsed, and the main content area displays a table of permission sets. The table columns are Action, Permission Set Label, Description, and License. The table lists various permission sets such as Buyer, Buyer Manager, CRM User, Commerce Admin, Contact Center Admin, Contact Center Agent, Contact Center Supervisor, Experience Profile Manager, Facility Manager, Field Service Mobile Standard PermSet, Merchandiser, Order Management Agent, and Order Management Operations Manager. Each row includes a checkbox for Action and a Clone link. The Description column provides a brief overview of each permission set's features, and the License column indicates the specific license required for each.

Action	Permission Set Label	Description	License

<input type="checkbox"/>	Merchandiser	Allow access to commerce merchandising features.	Commerce Merchandiser User Permission Set License Seat
<input type="checkbox"/>	Order Management Agent	Read Access to all entities enabled by Order Management	Lightning Order Management User
<input type="checkbox"/>	Order Management Operations Manager	Access to all features enabled by Order Management	Lightning Order Management User

The screenshot shows the Salesforce Setup interface under the 'Permission Sets' tab. A permission set named 'permission12' is selected. The 'Object Settings' section is displayed, listing various objects and their permissions. The table includes columns for Object Name, Object Permissions, Total Fields, and Tab Settings.

Object Name	Object Permissions	Total Fields	Tab Settings
Account Brands	No Access	9	--
Accounts	No Access	44	--
AI Insight Reasons	No Access	--	--
AI Record Insights	No Access	--	--
Alternative Payment Methods	No Access	27	--
API Anomaly Event Stores	No Access	14	--
App Analytics Query Requests	No Access	--	--
Application Usage Assignments	No Access	--	--
Appointment Categories	No Access	3	--
Appointment Invitations	No Access	17	--
Appointment Invitees	No Access	4	--
Appointment Schedule Aggregates	No Access	--	--
Appointment Schedule Logs	No Access	--	--
Appointment Topic Time Slots	No Access	6	--
Asset Actions	No Access	30	--
Asset Action Sources	No Access	18	--

The screenshot shows the 'Object Permissions' section for the 'Accounts' object within the 'permission12' permission set. It lists various permissions (Read, Create, Edit, Delete, View All, Modify All) and their status (Enabled or Not Enabled). Below this, the 'Field Permissions' section is partially visible, showing permissions for specific account fields.

Permission Name	Enabled
Read	<input type="checkbox"/>
Create	<input type="checkbox"/>
Edit	<input type="checkbox"/>
Delete	<input type="checkbox"/>
View All	<input type="checkbox"/>
Modify All	<input type="checkbox"/>

Step 7:

Now to give the specific delete access to the user click on edit on the Account and then enable the read, create, edit and the delete on it so that the permission set will have a specific special access on it. once it has been done click on save and then click on manage assignment.

The screenshots show the Salesforce Setup interface for creating a new permission set. The permission set is named 'permission12'. In the 'Object Permissions' section, the 'Delete' permission is checked for the 'Accounts' object. In the 'Field Permissions' section, the 'Delete' permission is checked for the 'Account Name' field.

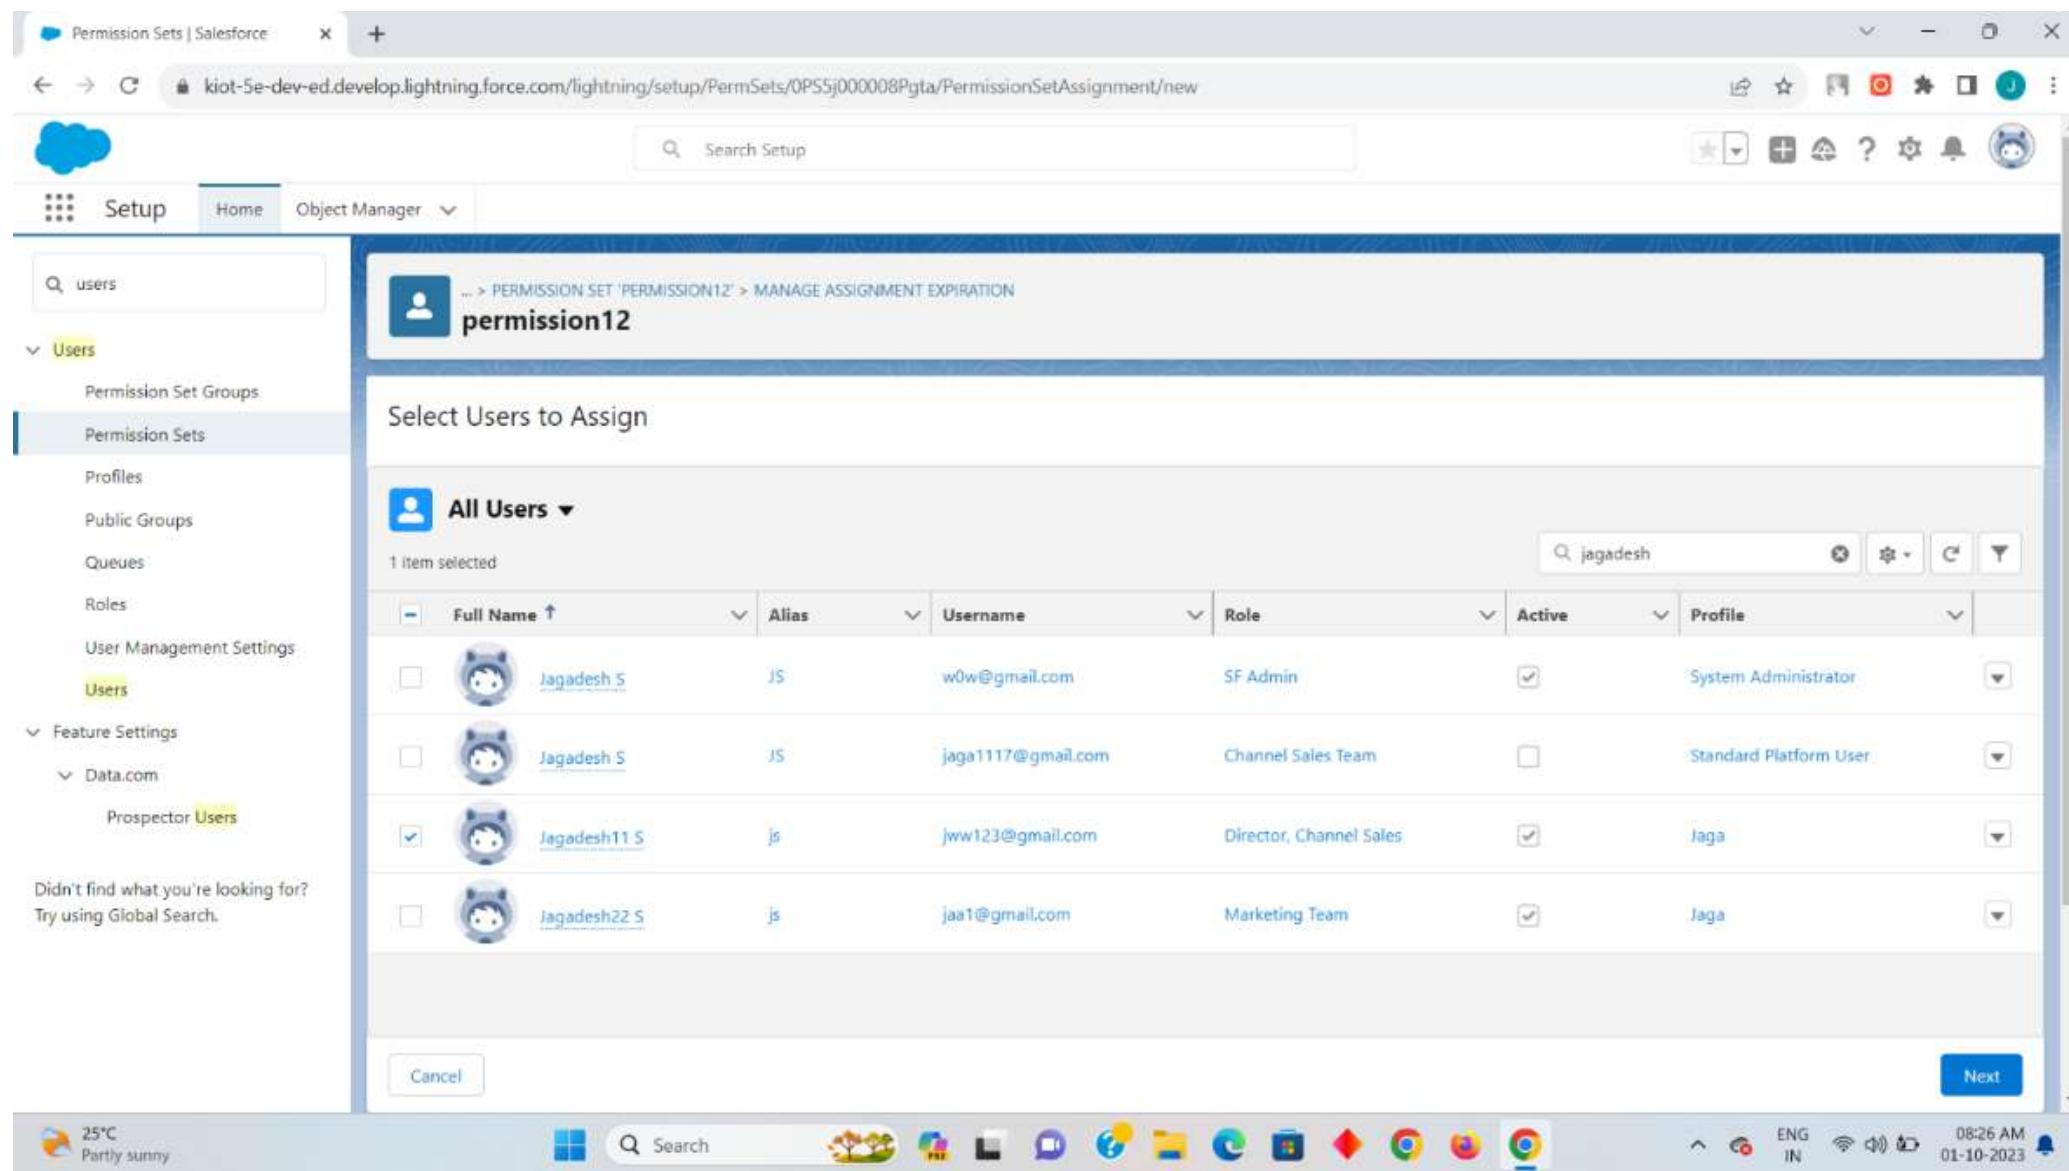

Step 8

Now click on add assignment there you will find your two created users click on anyone user to give a special access as delete on it and then click

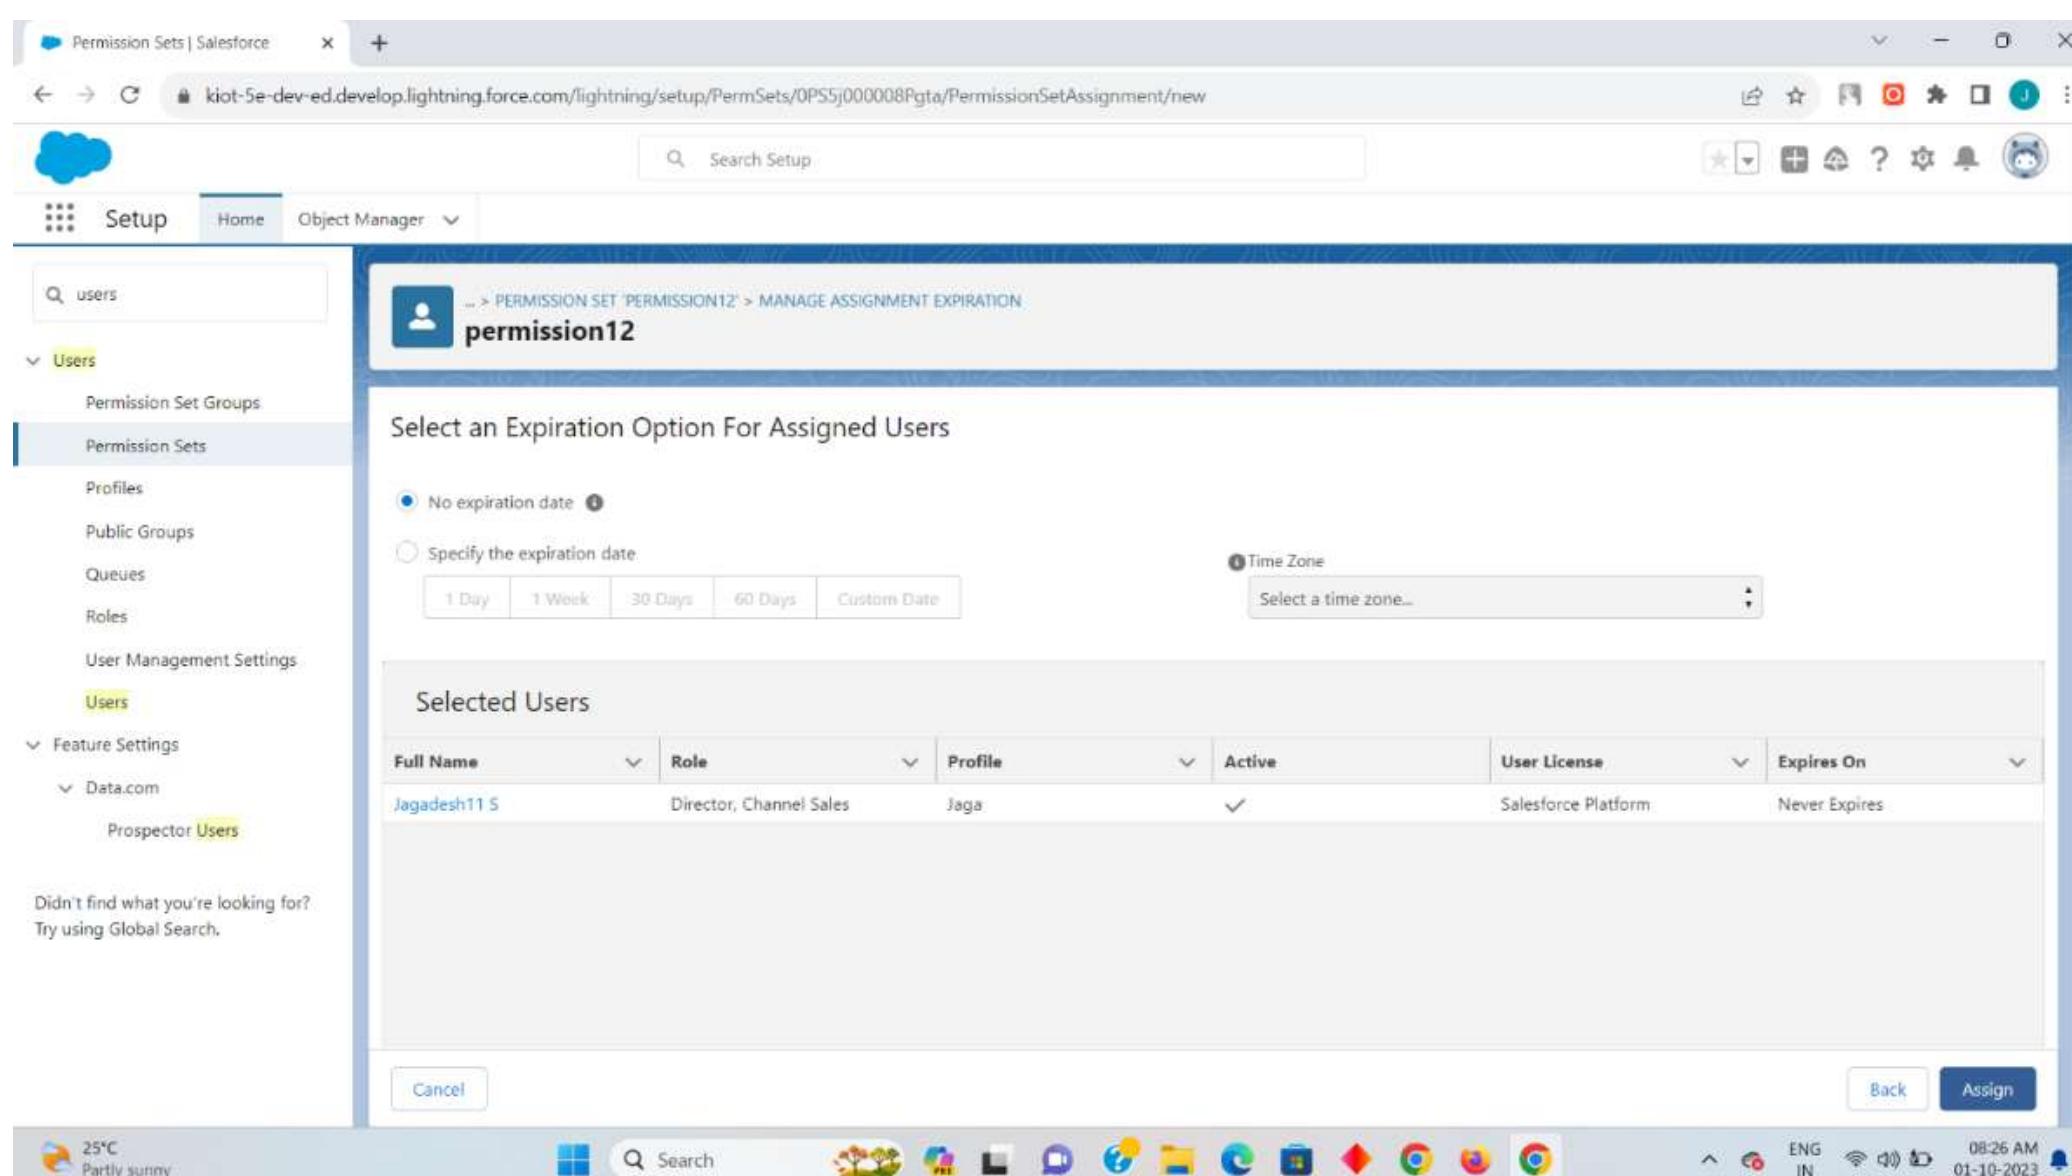

on assign so that the specific selected user can have a special access as delete on it.

This screenshot shows the 'Permission Sets | Salesforce' page in the Salesforce setup interface. The URL is kiot-5e-dev-ed.lightning.force.com/lightning/setup/PermSets/0P55j000008Pgta/PermissionSetAssignment/home. The left sidebar is expanded, showing sections like 'Users', 'Permission Set Groups', 'Permission Sets', 'Profiles', 'Public Groups', 'Queues', 'Roles', 'User Management Settings', and 'Feature Settings'. The 'Users' section is currently selected. The main content area is titled 'permission12' and shows a decorative illustration of a cactus and sun. Below the illustration, a message says 'No assignments defined.' There are three buttons at the top right: 'Edit', 'View', and 'Add Assignment'. The status bar at the bottom indicates it's 08:25 AM on 01-10-2023.

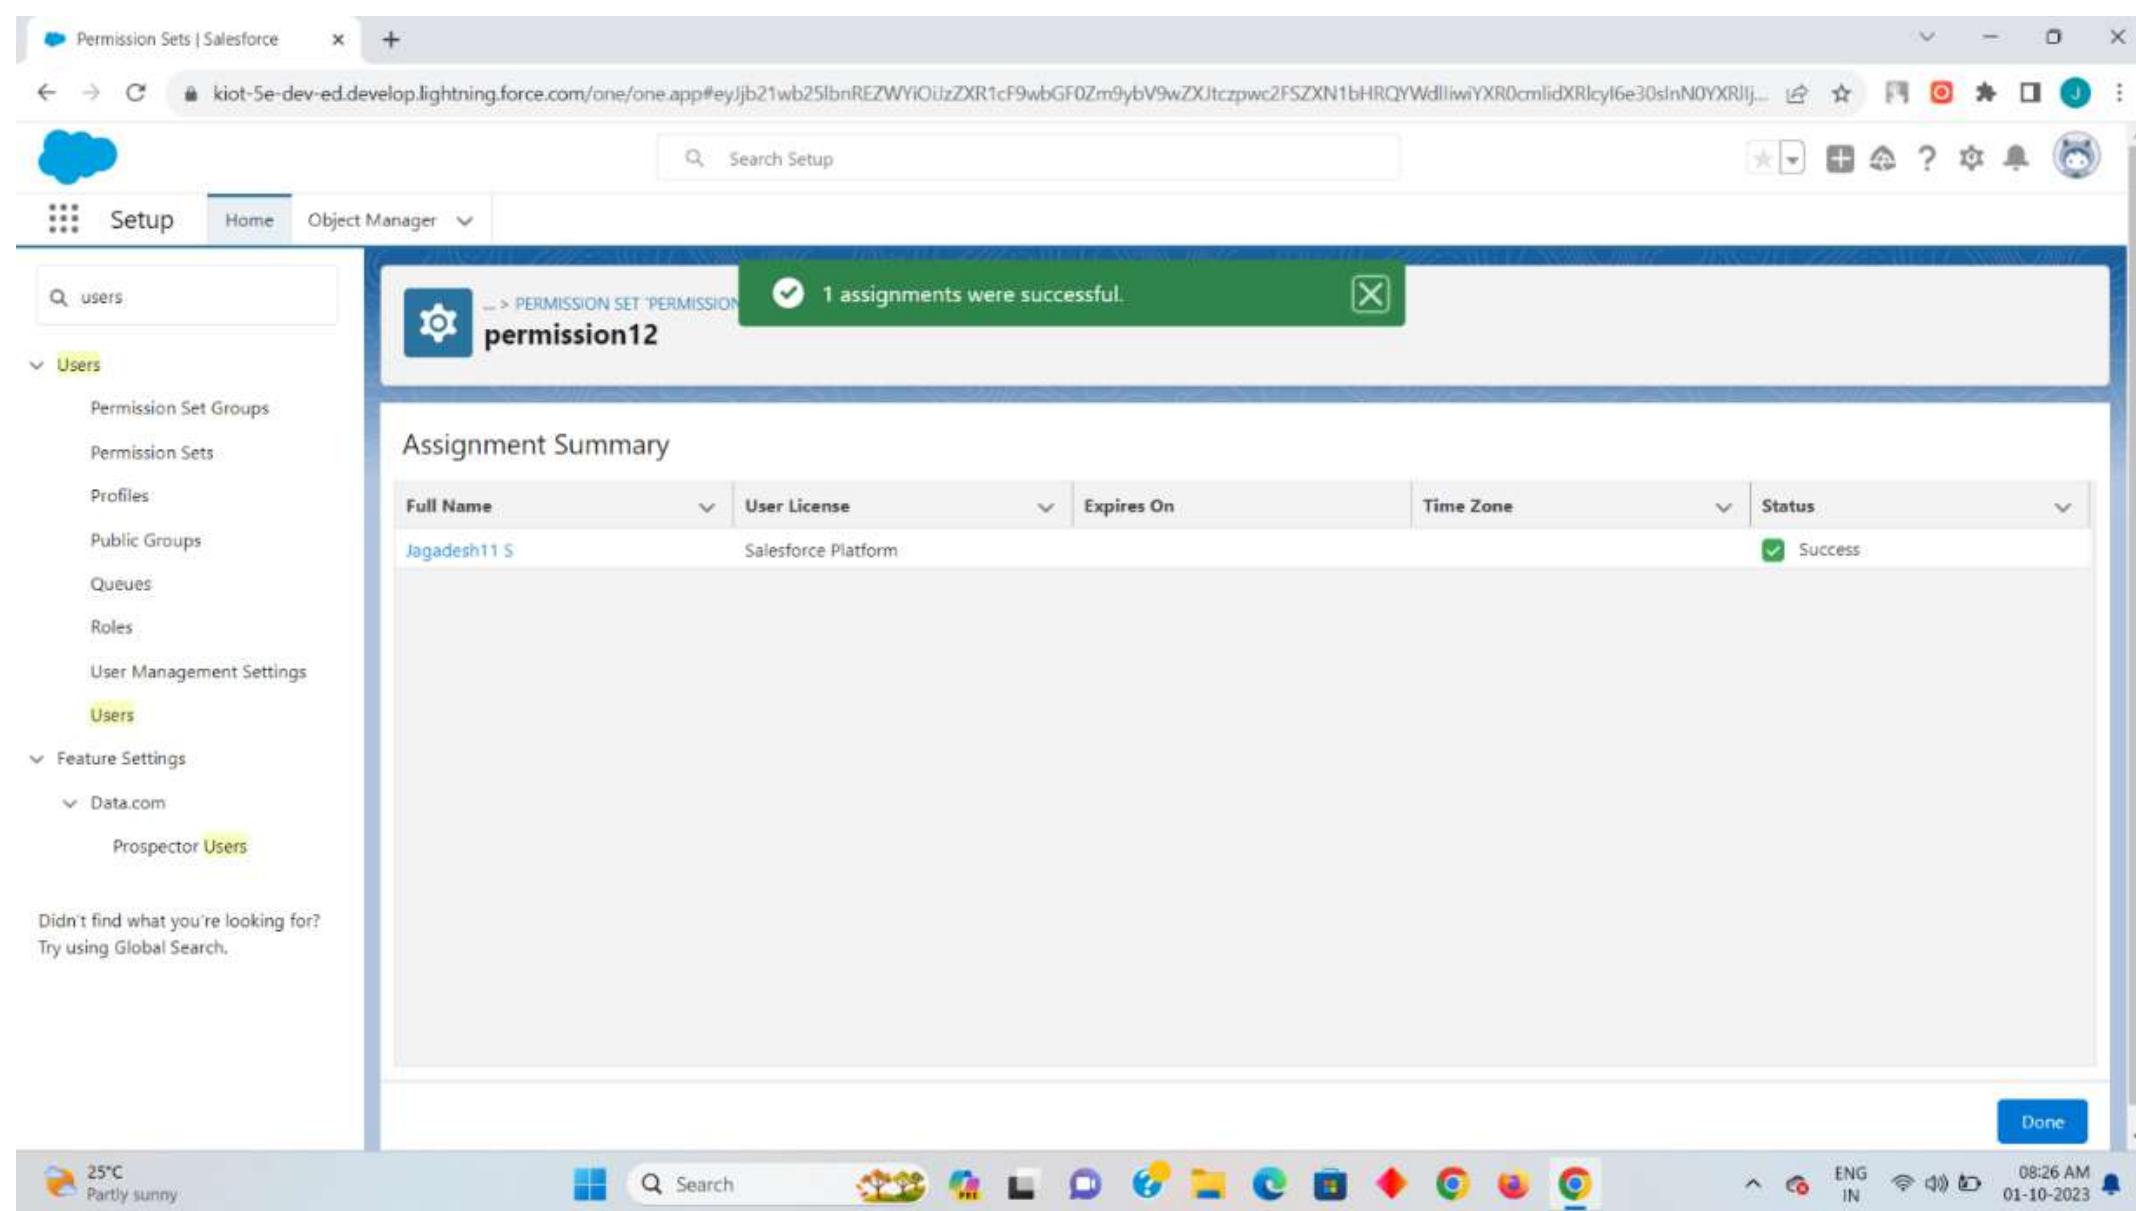

This screenshot shows the 'Manage Assignment Expiration' step of the permission set assignment process. The URL is kiot-5e-dev-ed.lightning.force.com/lightning/setup/PermSets/0P55j000008Pgta/PermissionSetAssignment/new. The left sidebar is identical to the previous screenshot. The main content area is titled 'permission12' and shows a 'Select Users to Assign' dialog. It lists four users under 'All Users': Jagadesh S (SF Admin, System Administrator), Jagadesh S (Channel Sales Team, Standard Platform User), Jagadesh11 S (Director, Channel Sales, Jag), and Jagadesh22 S (Marketing Team, Jag). A search bar at the top of the list shows 'jagadeth'. The status bar at the bottom indicates it's 08:26 AM on 01-10-2023.

Click on next.

Now click on Assign.

Now the specific access for the Jagadesh11 user has been assigned successfully.

4.Create a screenflow for a basic survey to fill in the details for any form.

Solution:

Step 1: Create a Custom Object

The next step is to create a custom object Survey Result and a few custom fields to store survey responses.

1. Click Setup.
2. In the Object Manager, click Create | Custom Object.
3. Now create a custom object Survey Result and fields as shown in the screenshot below:
4. Click Save.

Fields & Relationships		FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
8 Items, Sorted by Name		Comment	Comment__c	Text Area(255)		
New Deleted Fields Field Dependencies Set History Tracking		Created By	CreatedById	Lookup(User)		
		Email	Email__c	Email		
		Last Modified By	LastModifiedById	Lookup(User)		
		Name	Name__c	Text(51)		
		Owner	OwnerId	Lookup(User,Group)		
		Rating	Rating__c	Picklist		
		Survey Result Name	Name	Auto Number		

Step 2: Create a Thank You For Survey Lightning Email Template

1. Click App Launcher.
2. In the Quick Find box, type Email Templates.
3. Clicks on the New Email template button.
4. Name the Lightning Email Template and make sure to store it in the Public Email Templates folder.
5. Create a template like the following screenshot.

Email Template
Thank You Email - Survey

---	---

Step 3: Create an Email Alert

1. Click Setup.
2. In the Quick Find box, type Email Alerts.
3. Select Email Alerts, click on the New Email Alert button.

4. Name the Email Alert and click the Tab button. The Unique Name will populate.
5. For Object select Survey Result.
6. For the Email Template chooses Lightning Email Template Thank You Email - Survey.
7. For Recipient Type select Email Field: Email.
8. Click Save.

Edit Email Alert
Survey - Thank You Email Help for this Page 

Create an email alert to associate with one or more workflow rules, approval processes, or entitlement processes. When changing an email alert, any modifications will apply to all rules, approvals, or entitlement processes associated with it.

Email Alert Edit		Save <input type="button"/> Save & New <input type="button"/> Cancel <input type="button"/>

<input type="button" value="Save"/> <input type="button" value="Save & New"/> <input type="button" value="Cancel"/>		

Step 4.1: Salesforce Flow—Create a Screen that Allow Users to Fill Survey

1. Click Setup.
2. In the Quick Find box, type Flows.
3. Select Flows then click on the New Flow.
4. Select the ScreenFlow option and click on Next and configure the flow as follows:

1. How do you want to start building: Freeform

5. We will use the Screen element to capture a Survey response form. Drag and drop a Screen element onto the canvas.

Step 4.2: Salesforce Flow—Add a Record Creates Element to Save Survey Response

1. Drag-and-drop the Create Records element onto the Flow designer.
2. Enter a name in the Label (Save Response) field; the API Name will auto-populate.
3. For How Many Records to Create – select One.
4. For How to Set the Record Fields – select Use separate resources, and literal values.
5. Select the Survey_Result__c object from the dropdown list.

6. Set Field Values for the Survey Result

1. Row 1:

1. Field: Comment__c
2. Value: {!Comment}

2. Click Add Row

3. Row 2:

1. Field: Email__c
2. Value: {!Email.value}

4. Click Add Row

5. Row 3:

1. Field: Name__c
2. Value: {!Name.firstName}
 {!Name.lastName}

6. Click Add Row

7. Row 3:

1. Field: Rating__c
2. Value: {!Rating}

7. Click Done.

Edit Create Records

Create Salesforce records using values from the flow.

* Label	* API Name

Manually assign variables

Cancel Done

Step 4.3: Salesforce Flow—Call an Action—Email Alert to Send Out Thank You Email

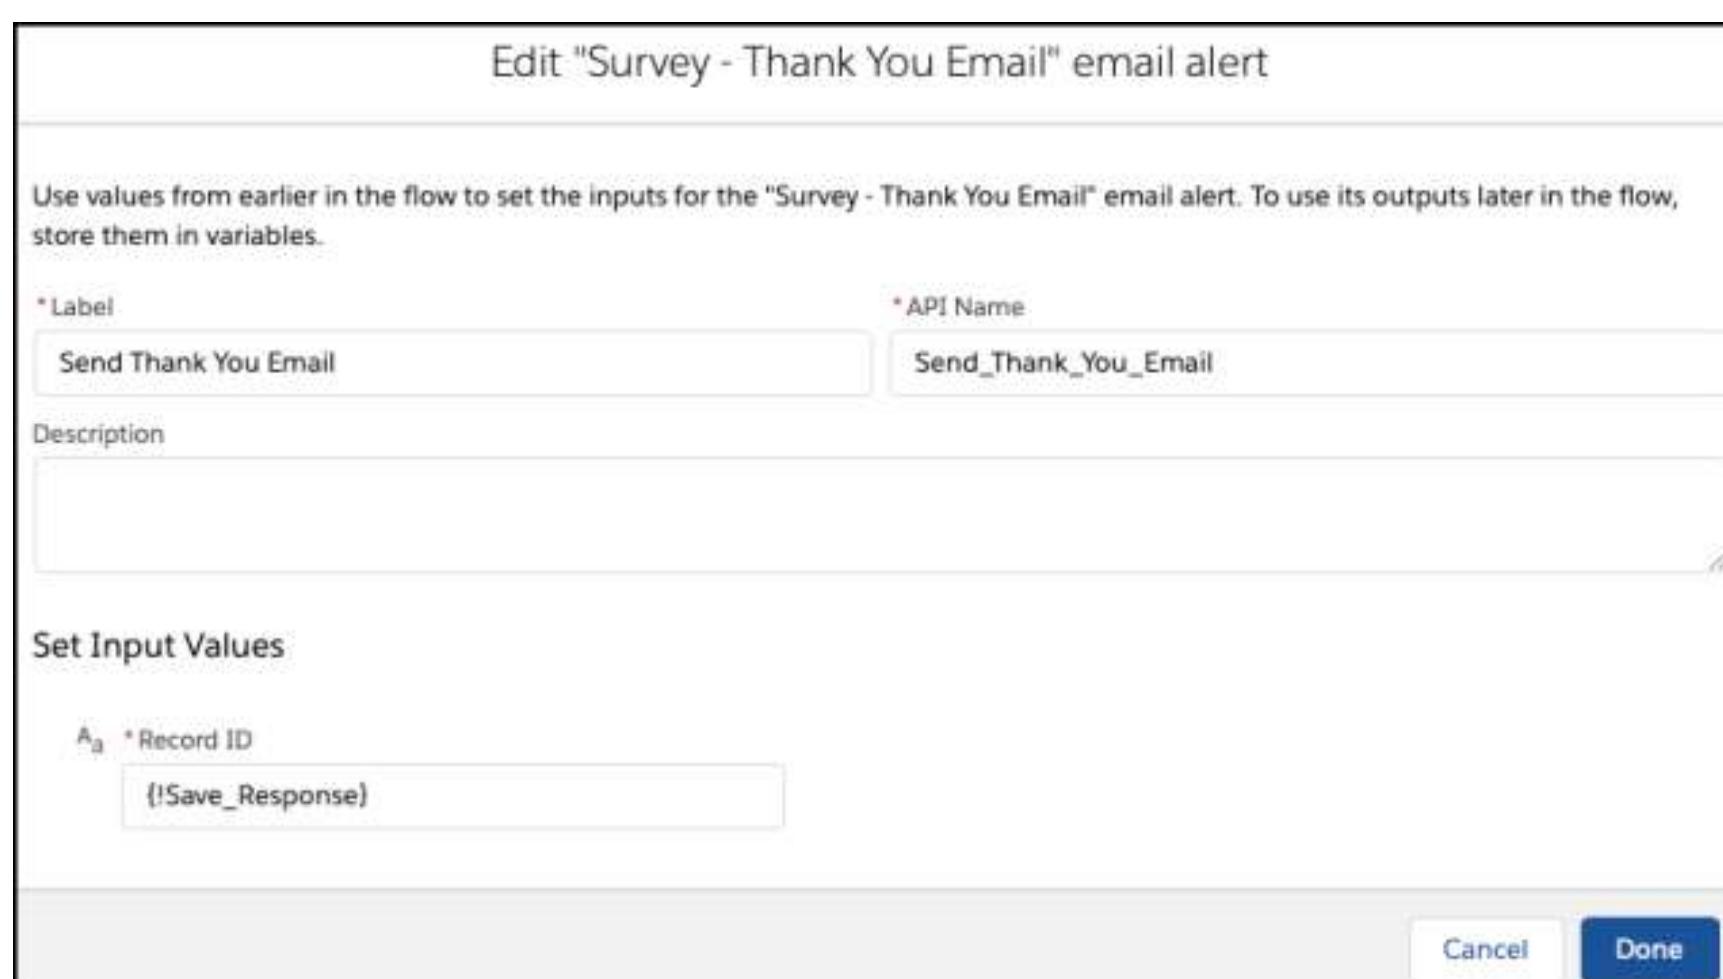

The next step is to call the Survey—Thank You Email email alert from flow so that when flow fires it triggers the thank you email to survey participants.

1. Under Toolbox, select Element.
2. Drag-and-drop Action element onto the Flow designer.

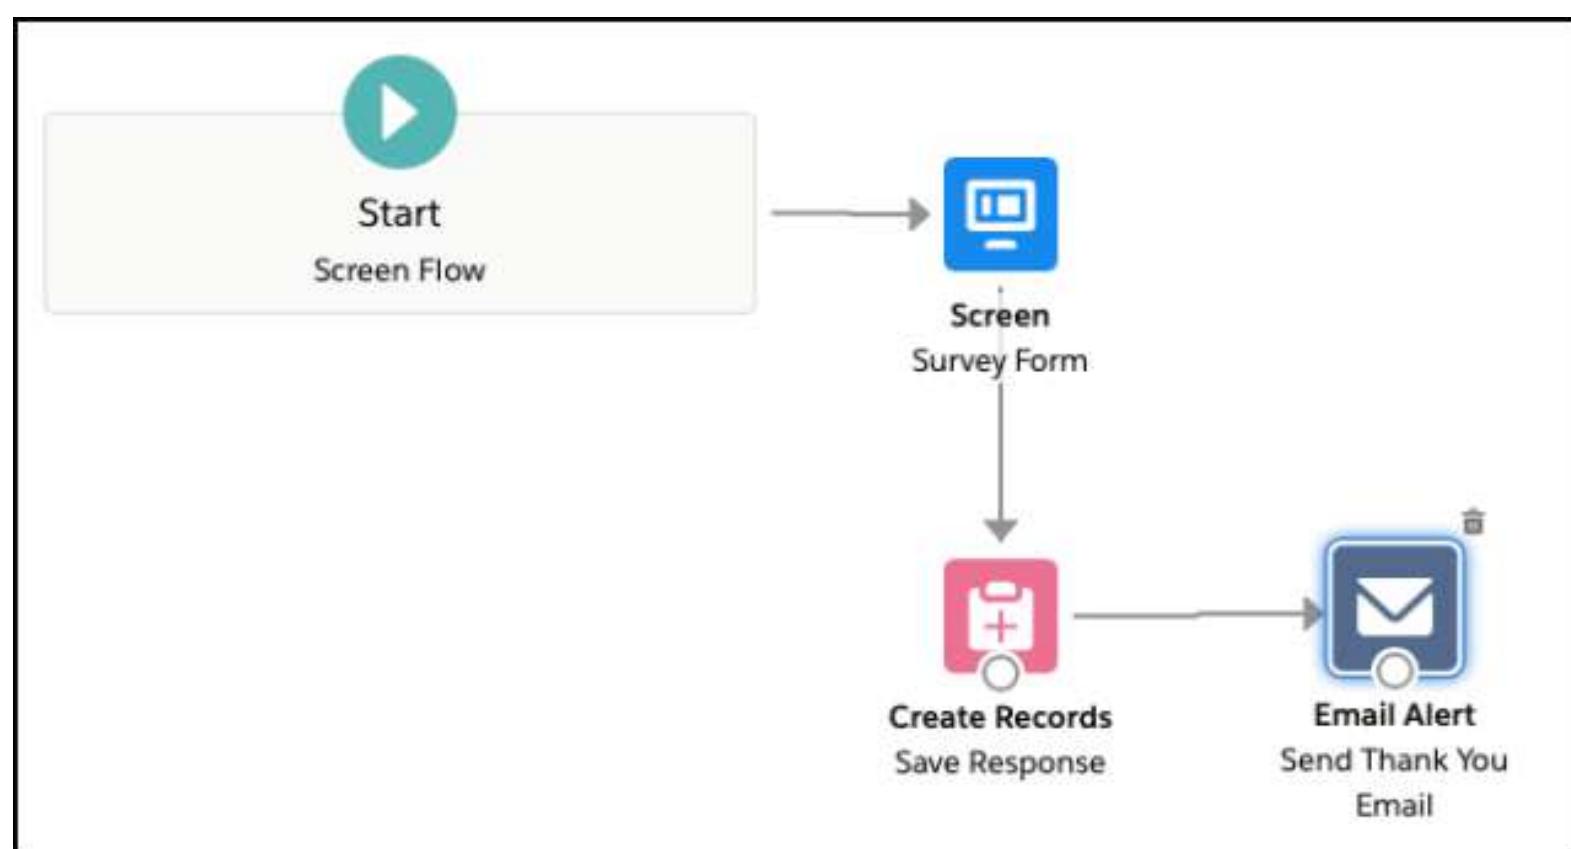

3. In the Action box, type Survey- Thank You Email.

4. Clicks on the Survey- Thank You Email email alert.

5. Click Done.

In the end, Sergio's Flow will look like the following screenshot:

1. Click Save.

2. Enter Flow Label the API Name will auto-populate.

3. Click Show Advanced.

4. How to Run the Flow: User or System Context—Depends on How Flow is Launched

5. Type: Screen Flow

6. API Version for Running the Flow: 51

7. Interview Label: Survey

{!\$Flow.CurrentDateTime}

8. Click Save.

Save as

A New Version A New Flow

* Flow Label: Survey * Flow API Name: Survey

Description:

Hide Advanced

How to Run the Flow: User or System Context—Depends on How Flow is Launched

* Type: Screen Flow

* API Version for Running the Flow: 51

Interview Label: Survey {!\$Flow.CurrentDateTime}

Last Modified: 12/21/2020, 4:54 PM by Rakesh Gupta

Status: Active Type: Screen Flow Version Number: 2

Cancel Save

The screenshot shows the 'Save as' dialog for a new flow named 'Survey'. It includes fields for Flow Label (Survey), Flow API Name (Survey), Description, and Interview Label (Survey {!\$Flow.CurrentDateTime}). Advanced settings like 'How to Run the Flow' (User or System Context—Depends on How Flow is Launched) and 'Type' (Screen Flow) are also visible. The bottom section displays last modified information (12/21/2020, 4:54 PM by Rakesh Gupta), status (Active), type (Screen Flow), and version number (2). Buttons for 'Cancel' and 'Save' are at the bottom right.

Step 5: Create a Lightning Application to Render Lightning Runtime for Flow in a Visualforce Page

Now we will create a Lightning Application that declares a dependency on the `lightning:flow` component.

1. Click Setup | Developer Console
2. Navigate to File | New | Lightning Application
3. Enter a Name (`VFPageToLC`) field, make sure to select the `LightningOut Dependency` App checkbox.
4. Click Submit.
5. Copy code from [GitHub](#) and paste it into your Lightning Application.
6. Save your code.

```
File ▾ Edit ▾ Debug ▾ Test ▾ Workspace ▾ Help ▾ < >
VFPPageToLC.app * 3
1 <aura:application access="global"
2           extends="ltng:outApp"
3           implements="ltng:allowGuestAccess">
4     <aura:dependency resource="lightning:flow"/>
5   </aura:application>
Logs, Tests, and Problems
```

Step 6: Create a Visualforce Page and Embed Your Flow Into It

Now we will create a Lightning Application that declares a dependency on the lightning:flow component.

Add the Lightning Components for Visualforce JavaScript library to your Visualforce page using the `<apex:includeLightning/>` component. In the Visualforce page, reference the dependency

app. Then write a JavaScript function that creates the component on the page using `$Lightning.createComponent()`

1. Click Setup.
2. In the Quick Find box, type Visualforce Pages.
3. Clicks on the New button.
4. Copy code from [GitHub](#) and paste it into your visualforce page
5. Click Save.

The screenshot shows the Visualforce Page Editor interface. At the top, there's a header with 'Visualforce Page' and the page name 'Survey'. Below the header is a 'Page Edit' toolbar with buttons for 'Save', 'Quick Save', 'Cancel', 'Where is this used?', 'Component Reference', and 'Preview'. The main area is divided into sections: 'Page Information' (Label: Survey, Name: Survey, Description: empty), 'Available for Lightning Experience, Experience Builder sites, and the mobile app' (checkbox checked), and 'Requires CSRF protection on GET requests' (checkbox unchecked). Below these sections is a tab bar with 'Visualforce Markup' (selected) and 'Version Settings'. The 'Visualforce Markup' tab contains the following code:

```
<apex:page showheader="false" lightningStylesheets="true">
<html>
    <head>
        <apex:includeLightning />
        <!-- Use apex:includeLightning to add the Lightning Components for Visualforce JavaScript library to your Visualforce page -->
    </head>
    <body class="slds-scope">
        <div id="flowContainer" />
        <script>
            var statusChange = function (event) {
                if(event.getParam("status") === "FINISHED") {
                    var outputVariables = event.getParam("outputVariables");
                    var key;
                    for(key in outputVariables) {
                        if(outputVariables[key].name === "myOutput") {
                            // ...
                        }
                    }
                }
            };
            $Lightning.use("c:VFPPageToLC", function() {
                $lightning.createComponent("lightning:flow", {"onstatuschange":statusChange},
                    "flowContainer",
                    function (component) {
                        component.startFlow("Survey", );
                    }
                );
            });
        </script>
    </body>

```

Step 7: Create a Force.com Site to Open Your Flow for Unauthenticated Access

Now we will create a site to open the flow for unauthenticated access.

1. Click Setup.
2. In the Quick Find box, type Sites.
3. Clicks on the New button.
4. Fill the details as per the screenshot below:
5. Click Save.

Site Edit

Save Cancel
